INNOCEAN Sustainaibilty Report 2024

INNOCEAN

INNOCEAN goes beyond the realm of advertising agencies to provide creative and innovative brand experiences based on new technologies and data.

About This Report

Report Overview

INNOCEAN is set to release its second Sustainability Report in 2025 to communicate its sustainability efforts and achievements with stakeholders. This report provides an integrated overview of both financial and non-financial performance that have a significant impact on our business operations. By publishing this report on a regular basis, INNOCEAN aims to disclose the activities and performance of sustainable management transparently and enhance stakeholder engagement.

Reporting Period

This report encompasses sustainability activities and performance for the fiscal year 2024 (January 1, 2024 - December 31, 2024). To enhance the timeliness and importance of the information, data from the first half of 2025 has been included for certain activities. Additionally, data from the past three years (2022 - 2024) is presented for areas where trend analysis is essential.

Reporting Scope and Boundary

This report discloses our financial performance and provides information on INNOCEAN's global market presence to stakeholders. The scope of reporting on environmental and social information is limited to domestic operations (not including subsidiaries, etc). We plan to gradually expand this scope in future reports.

Reporting Standards

This report has been prepared in accordance with the GRI (Global Reporting Initiative) Standards 2021. In addition, to address industry-specific material issues, it also references the SASB (Sustainability Accounting Standards Board) standards and aligns with relevant UN SDGs (UN Sustainable Development Goals). The financial information presented in the report follows the K-IFRS (Korean International Financial Reporting Standards).

Independent Assurance

To ensure the reliability and fairness of the content and report preparation process, this report has been independently verified by the KPCQA (Korea Productivity Center Quality Assurance). The certification standard applied was AA1000AS v3. Verification results can be found in the third-party assurance statement on page 107.

Forward-Looking Statements

This report may include forward-looking statements that relate not only to current or historical facts but also to future circumstances. Please note that actual results may differ materially from those expressed or implied. Accordingly, investors are advised not to place undue reliance on them. Unless required by applicable laws or regulations, INNOCEAN assumes no obligation to update any forward-looking statements, due to the occurrence of new information, future events, or other changes in circumstances.

CEO Message

Dear valued stakeholders,

I am Yongwoo Lee, Global CEO of INNOCEAN.

Despite an unstable and unpredictable global environment, 2024 was a meaningful year in which INNOCEAN reaffirmed its strength and potential as a global marketing communications company.

We won Grand Prix honors at the Cannes Lions International Festival of Creativity and the Clio Awards, two of the world's most prestigious advertising competitions. These, along with multiple accolades at other leading domestic and international awards, further solidified INNOCEAN's creative excellence on the global stage.

In the customer experience (CX) space, we successfully delivered on several challenging global projects, including the 2024 Paris Olympics. We also formed Al alliances with leading tech companies at home and abroad to accelerate our digital transformation.

We also made meaningful progress on the ESG frontline.

In June 2024, we published our first-ever Sustainability Report, transparently disclosing INNOCEAN's ESG data and strengthening communication with stakeholders. We were given an overall A grade by the Korea Institute of Corporate Governance and Sustainability (KCGS), an objective validation of our ESG performance.

ESG Core Value

We were selected as a Top Job-Creation Company for the second consecutive year by the Ministry of Employment and Labor, and achieved the highest Win-win growth index rating for the fourth consecutive year though our unwavering commitment to mutual growth with partners.

A standout initiative was INNOCEAN's CSR project, Life-saving Bathhouse, which was designed and implemented to generate social value. The campaign earned global acclaim, winning Best of the Best at the Red Dot Award, Silver Pencil at The One Show, and Bronze at the Clio Awards.

Furthermore, we are fulfilling our social responsibility as an industry-leading company. This includes managing carbon emissions across our operations, conducting human rights impact assessments, strengthening data protection initiatives, promoting carbon reduction campaigns, addressing greenwashing risks, supporting diverse social impact programs, and operating a Sustainability Management Committee.

These efforts are more than the sum of their parts. They represent our direction for the future—an investment in INNOCEAN's long-term competitiveness and our unwavering commitment to sustainable growth. INNOCEAN will continue its activities to create sustainable and social value.

This May, INNOCEAN celebrated its 20th anniversary and introduced **BEYOND** as the key theme symbolizing our identity and vision. At INNOCEAN, BEYOND transcends the literal meaning of surpassing and encompasses the creativity, expansiveness, and future-oriented values we pursue.

Beyond Advertising. Beyond Agency. Beyond Ourselves.

INNOCEAN will continue to embrace bold challenges and grow toward a sustainable future. We look forward to your continued interest and support.

Sincerely,

Yongwoo Lee, Global CEO of INNOCEAN

Company Overview

About Company

INNOCEAN is a global marketing communication group recognized for delivering differentiated marketing solutions and services to leading brands both in Korea and around the world. The company has earned recognition at top international advertising festivals for its creative excellence and strategic executions. Headquartered in Korea, INNOCEAN operates 32 offices across 23 countries—including the Americas, Europe, Asia, Oceania, and the Middle East. With a team of over 4,100 employees, the company leverages extensive experience and expertise in diverse domains – from managing large-scale events such as the World Cup, mobility shows, IT and consumer electronics exhibitions, and the U.S. Super Bowl. INNOCEAN has demonstrated exceptional capabilities not only in advertising planning and production but also across creative content, digital and Al-powered solutions, and the mobility sector, actively exploring and pioneering new business opportunities.

INNOCEAN is pioneering new realms of experience, forging strong connections between brands and customers.

Company Overview

Corporate Philosophy

Mission

The name INNOCEAN—coined from the words Innovation and Ocean—embodies the company's founding aspiration to rise as a global leader in marketing communications through bold ideas and forward-thinking strategy. As a Brand Experience Solution Company, INNOCEAN is committed to designing differentiated brand experiences powered by top-tier creativity and cutting-edge technology.

VISION

VISION

Brand Experience Solution Company

INNOCEAN designs customer experiences and maximizes brand values at every touchpoint between brands and consumers. Evolving beyond a traditional advertising agency, we strive to become an exceptional BX Solution Company.

IDENTITY

BEYOND

Pursuing creativity, scalability, and future-oriented values, BEYOND represents our core driving force that enables us to push boundaries continually and lead sustainable future growth.

STRATEGY

BEYOND Advertising

Building on our core strength in creativity, we expand beyond advertising into a broader world of content.

To communicate more deeply and genuinely connect with consumers, we go beyond simply showing brands, and instead create immersive moments that people can experience, feel, and remember.

BEYOND Agency

Beyond the role of an advertising agency, we act as a strategic partner for our clients in designing their business growth and offering professional solutions.

By establishing collaborative networks with AI solution providers, we are reshaping our business ecosystem and moving beyond production-centric models.

BEYOND Ourselves

Embracing the pioneering spirit of the Hyundai Motor Group, INNOCEAN continues to cultivate its unique way of working and corporate culture.

We strive to transcend our own limits and build a new future grounded in our internal capabilities.

CODE of CONDUCT

WE CREATE BEYOND THE FAMILIAR.

WE SOLVE BEYOND THE BRIEF.

WE EXPLORE BEYOND THE BOUNDARY.

Company Overview

Management Policy and Strategic Tasks

In celebration of its 20th anniversary, INNOCEAN is preparing to take bold steps toward its next stage of growth.

The company has set forth its 2025 management policy and identified three strategic focus areas aimed at enhancing core customer values and strengthening internal capabilities.

Advancing BX Solutions through the Integration of Technology and Creativity

Establish a Foundation for the Next 20 years of Growth

Expand the scope of creativity (including CX, DX, and non-advertising content) Enhance creative production capabilities (leveraging generative AI and partnerships) Enhance global creative quality

Optimize Business Structure

Optimize campaign, CX, and digital business operations Optimize company-wide organizational structure Optimize company-wide workforce management

Enhance Corporate Culture

Improve Work Smart approach
Build a culture of challenge and innovation
Strengthen talent development and leadership management

2024 Highlights

Kev ESG Performance

In 2024, INNOCEAN, achieved meaningful results across many areas of ESG by actively engaging in ESG initiatives. Through active employee participation, we promoted action-oriented environmental management focused on carbon neutrality and ecosystem preservation. By linking our CSR efforts with talent donation activities, we sought to convert our professional capabilities into social value. At the same time, we reinforced sustainable governance by embedding ESG perspectives into—management decision-making processes—enhancing both accountability and transparency. Based on this organization-wide effort, INNOCEAN has internalized ESG values and further increased corporate competitiveness toward a sustainable future.

Key Achievements in 2024

ESG Evaluation Rating

Rated overall "A" in the ESG evaluation by the Korea Corporate Governance and Sustainability (KCGS)

Top Job-Creation Company

Selected as a top Job-Creation company for two consecutive years (Organized by the Ministry of **Employment and Labor)**

ESG Disclosure

Published the first Sustainability Report in 2024

Win-win Growth Index

Achieved the highest Win-win growth index rating for four consecutive years

Investor Relations Team

- Support board operations
- · Provide timely information to shareholders and investors
- · Conduct dividends to stakeholders

Governance

ESG Core Value

ESG Management

Materiality Assessment

INNOCEAN has conducted a double materiality assessment to identify issues with significant impact on both corporate sustainability and business operations. The double materiality assessment considers two aspects: the impact of corporate activities on the environment and society (Impact Materiality) and the financial impact of external factors on the company (Financial Materiality).

Based on the identified material issues, INNOCEAN analyzed its impact on society, the environment, and stakeholders, as well as the financial risks and opportunities posed by external conditions. Through IRO (Impact, Risk, Opportunity) analysis and strategic issue management involving both internal and external stakeholders, five key material issues were ultimately defined. These issues are integrated into INNOCEAN's risk management processes and disclosed to stakeholders through the Sustainability Report.

Double Materiality Assessment Process

STEP 01

Forming an Issue Pool

Creating issue pool (Long-list) based on domestic and international standards and emerging issues

Collecting Issue Information

- · Global initiatives such as GRI, DJSI, MSCI, SASB
- · Reflecting high priority issues from the previous year

A Pool of 31 issues

STEP 02

Identify Material Issues

Determining material issues (Short-list) through a materiality test

Conduct Materiality Test

- ·Analysis of internal sustainability-related strategies
- · Media analysis
- ·Benchmarking of domestic and international
- · Analysis of domestic and international laws and regulations
- · Domestic and international legal and regulatory analysis

6 Material Issues

STEP 03

Identify and Assess Impacts

Identifying environmental and social impacts and financial impacts, analyzing IRO according to the identified impacts

Identify Impacts of Each Issue

·Indentification of impact characteristics (positive / negative, actual / potential), impact scope, and impact timeline

Assess Impacts

- · Impact materiality assessment
- Assessment of impact's likelihood and severity
- · Financial materiality assessment
- Assessment of impacts on corporate value and financials

STEP 04

Determine and Disclose Key Material Issues

Determining key material issues by reflecting impact of priorities and sustainability topics

Analyze the Impacts

- Quantification of impact assessment results and comprehensive analysis
- · Identification of the impact scale and priorities

5 Key Material Issues

ESG Management

Materiality Assessment

As a result of the materiality assessment, INNOCEAN identified a total of six material issues. Based on the results of the impact assessment by issues, we selected five key material issues with high importance in terms of both environmental and social impacts and financial impacts.

increases transparency in planning and implementing advertisements as well as preventing illegal data utilization, and ultimately

opportunities, systematically manages its key material issues, and reports progress and outcomes through its Sustainability Report.

The final key material issues are:

- Information Security and Privacy Protection
- Establishment of an Inclusive Organizational Culture

improves industry-wide trust

Development and Training of Employee Capacity

- Establishment of a Human Rights Management System
- Development of a Climate Change Response System

In addition, reflecting Hyundai Motor Group's overarching ESG priorities, Establishment of Eco-Friendly Workplaces was designated as a strategic issue, with related activities and progress transparently disclosed. INNOCEAN conducts regular materiality assessments to identify sustainability-related risks and

Material Assessment Results

related to compensation for data breaches and recovery of brand image, thus maintain stable profitability.

ESG Management

Stakeholder Engagement

INNOCEAN categorizes its key stakeholders into six groups: partners, shareholders and investors, clients and consumers, employees, governments and NGOs, and local communities. To ensure effective engagement aligned with the nature of the advertising and marketing industry, we are strengthening two-way communication and collaboration. We also strive to build trust-based relationships through transparent information disclosure.

INNOCEAN Sustainability Report 2024 Introduction ESG Management ESG Core Value Appendix

Advancement of Eco-friendly Management

01 Environmental Management Practices

INNOCEAN's Mid- to Long-Term Environmental Management Roadmap

INNOCEAN has designated carbon neutrality (Net Zero) as a core mission for sustainable business operations and established a systematic environmental management policy and execution system to minimize the environmental impact of its business operations. Based on this, the company has formulated an environmental management policy and is working to achieve specific environmental goals through an eco-friendly management system. INNOCEAN is actively participating in initiatives to reduce greenhouse gas emissions, with the goal of achieving carbon neutrality by 2050.

01 Environmental Management Practices

Environmental Management Policy and Guidelines

In an effort to minimize environmental impacts across all areas of its business and improve environmental performance, INNOCEAN has established an environmental management guideline and policy, which it discloses transparently to its stakeholders. Our environmental management policy encompasses the fundamental principles and performance management systems for key areas including environmental pollution reduction, energy efficiency, and greenhouse gas management. To implement this policy, we are also promoting a variety of internal campaigns continuously to raise environmental awareness among our employees.

INNOCEAN Environmental Guideline

INNOCEAN acknowledges the current and future significance of the environment in pursuit of economic development and environmental conservation, and actively fulfills its responsibilities as a social and economic stakeholder.

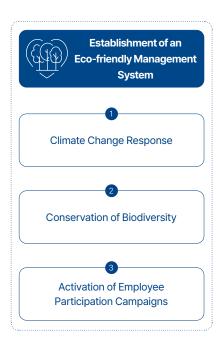

- 01 Recognize the environment as a critical success factor for the company, creating corporate value and fulfilling social responsibility through proactive environmental management.
- 02 Establish achievable objectives to combat climate change and assess performance in achieving these
- 03 Support partners' environmental management initiatives actively and establish the necessary standards to implement the eco-friendly partnership chain policies.
- 04 Ensure compliance with domestic and international environmental laws and agreements, and create and execute policies essential for advancing environmental management.
- Formulate policies aimed at protecting biodiversity and preserving the natural environment.
- Disclose environmental management performance to company members and stakeholders based on reasonable and objective criteria

Environmental Management Goals

INNOCEAN is committed to reducing the environmental impact of its business operations by setting mid-tolong-term climate response goals and execution strategies, which are being implemented in stages. In 2024, INNOCEAN set "Establishment of an Eco-Friendly Management System" as its core direction and sequentially carried out initiatives such as the timely disclosure of environmental information, systematic management of environmental performance data, and campaigns that encourage voluntary employee participation. In the future, we plan to further strengthen the foundation of sustainable environmental management by building a system that integrates and systematizes environmental data.

Environmental Management Plan in 2024

01 Environmental Management Practices

Environmental Management Implementation Plan

INNOCEAN has established implementation measures based on environmental management guidelines and goals to minimize environmental risks and generate positive environmental performance. In addition to complying with laws and regulations, we monitor and improve our environmental performance continuously, advancing implementation strategies gradually in response to legal revisions, social demands, and changes in the business environment. To improve communication with internal and external stakeholders and enhance transparency in environmental management, INNOCEAN also discloses its environmental information voluntarily through the Environmental Information Disclosure System (www.env-info.kr).

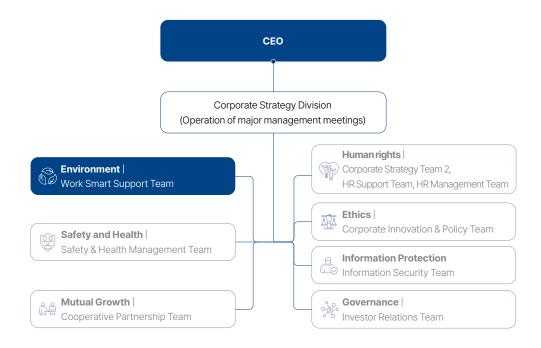

Environmental Management Implementation Process

Environmental Management Organization

INNOCEAN is carrying out a variety of activities centered around its ESG Council to make environmental management practical. The ESG Council addresses environmental issues comprehensively, including the establishment and revision of environmental management policies, review of environmental risks, performance evaluations, and the discussion of response measures. Through this, we aim to have a more effective decision-making framework. Furthermore, the Work Smart Support Team, a dedicated organization specializing in environmental management, handles all environmental-related tasks to strategically respond to environmental management risks and implement systematic management.

INNOCEAN Environmental Management Governance

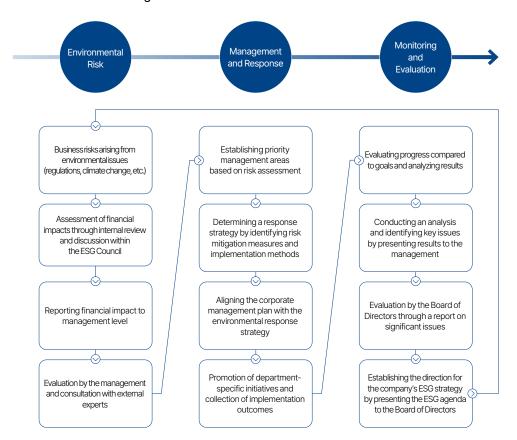

01 Environmental Management Practices

Environmental Risk Management Process

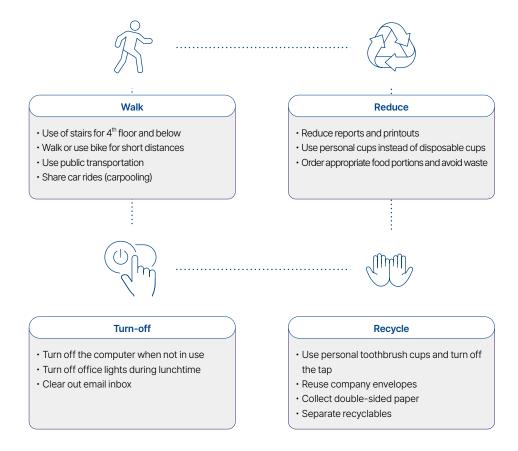

INNOCEAN recognizes the potential impact that environmental risks may have on its overall business operations. We have established a process for monitoring a range of environmental risks regularly, including climate change and violations of environmental regulations, in order to identify and manage risks effectively. INNOCEAN will continue to enhance its decision-making framework and strengthen its risk response capabilities to ensure the effective management of environmental risks.

Environmental Risk Management Process

Green Life Practices

INNOCEAN actively encourages its employees to engage in eco-friendly practices in their daily lives. INNOCEAN promotes green activities that can be implemented in daily work routines, such as "walk, reduce, turn-off, and recycle," and continues its efforts to reduce energy consumption, waste generation, and water usage.

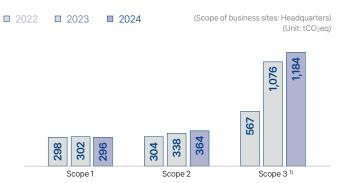

02 Climate Change Response

Greenhouse Gas Emissions Management

Although INNOCEAN is not subject to the Emissions Trading and Target Management System for greenhouse gas emissions, it manages its greenhouse gas emissions voluntarily as part of its commitment to addressing climate change. We measure and manage greenhouse gas emissions across Scope 1, 2, and 3, and ensure data reliability through third-party verification.

Greenhouse Gas Emissions Over the Past 3 Years

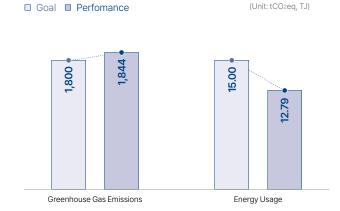

1) Scope 3 includes Category 6 (business trips) and Category 7 (commuting emissions)

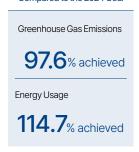

Energy and GHG Intensity

Greenhouse Gas and Energy Goals and Progress for 2024

Compared to the 2024 Goal

Carbon Neutrality Campaign

INNOCEAN implements various employee engagement campaigns to achieve carbon neutrality. We encourage turning off lights during lunchtime to reduce unnecessary power consumption and operate a coupon reward system for tumbler use to minimize disposable cup usage. During summer, we promote the "Cool Attire Campaign," encouraging cooling attire such as sandals, short sleeves, fans, and cooling sleeves to save air conditioning energy. Additionally, we minimize paper usage by internalizing paperless work practices.

Environmental Education

INNOCEAN trains employees on its ESG vision and eco-friendly management system through the "Happy INNO Time" program, led by the CEO. In November 2024, we conducted an environmental education session for employees under the theme "Corporate Transformation in Response to Climate Change." Additionally, during river ecosystem restoration activities, environmental experts offered education on the importance of climate change and biodiversity, raising environmental awareness of employees.

02 Climate Change Response

INNOCEAN Green-Action Week

In an effort to expand eco-friendly practices among employees and raise environmental awareness, INNOCEAN operates a "Focused Action Period." During this period, INNOCEAN runs intensive campaigns and implements a range of structured energy-saving initiatives. By carrying out the intensive campaign around Energy Day (August 22), INNOCEAN aims to encourage environmentally friendly work habits throughout the organization.

2024 Green-Action Week Energy Saving Campaign

Operation of Eco-friendly Vehicles

INNOCEAN is transitioning its company-owned vehicles to eco-friendly models to establish a culture of environmental sustainability. INNOCEAN currently operates 2 electric vehicles and 6 hybrid vehicles, contributing to reduced greenhouse gas emissions and air pollutants from corporate transportation.

03 Protection of Biodiversity

Promotion of Biodiversity Enhancement Project

Recognizing that climate change-induced extinction of species poses a serious threat to the balance of global ecosystems, INNOCEAN is carrying out a variety of initiatives to protect natural ecosystems and biodiversity. In particular, INNOCEAN promoted key activities, including safeguarding habitats for endangered species, creating protected areas, and planting aquatic vegetation. INNOCEAN became the first private company to participate in the creation of a wildlife sanctuary at the confluence of the Jungnangcheon and Cheonggyecheon streams, which is designated as Seoul's first migratory bird

Once considered an ecological wasteland, the area has been transformed into a viable conservation site through tree planting, environmental protection activities, and support for biodiversity research. INNOCEAN will continue monitoring biodiversity enhancement progress and strengthening related monitoring systems. Through sustained employee participation in biodiversity conservation projects, INNOCEAN contributes to ecosystem restoration and a sustainable future.

Jungnangcheon Sanctuary Project

Overview

- · Research Institutions: Environmental Ecology Lab and Institute of Urban Sciences, University of Seoul
- Research Period: January 31, 2024 February 28, 2025
- · Research Scope: Research on flora, vegetation, birds, amphibians and reptiles, insects, benthic macroinvertebrates, fish, and mammals
- Area: 10.000m²
- · Project Partners: Seongdong District Office, Social Cooperative Hangang (Three-Party Agreement)

Research findings

- Birds: The Seoul Metropolitan Government has designated the area as a bird sanctuary with the confirmed presence of 4 legally protected species (2 endangered species designated by the Ministry of Environment: Bean Goose, Eurasian Sparrowhawk) and 3 natural monuments (Mandarin Duck, Common Kestrel, Sparrowhawk).
- · Amphibians and Reptiles: A total of 11 species and 1 subspecies were confirmed across 3 orders and 8 families; 5 species including the Red-Bellied Toad, Toad, Tree Frog, Narrow-Mouthed Toad, and Black-Spotted Pond Frog were observed.
- · Insects: The Red Dragonfly, a protected species in Seoul, was investigated.
- Fish: A total of 1,481 individuals from 23 species, 20 genera, and 8 families were reported. Rare species such as the Korean Striped Bitterling, Korean Oily Shinner, Korean Sharpbelly, and Catfish were confirmed.

ESG Core Value

Special Page | Establishment of Eco-Friendly Workplaces

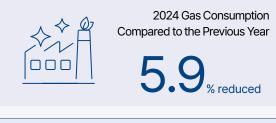

INNOCEAN minimizes the environmental impact at its office spaces and production sites through eco-friendly practices. By reducing disposable item usage and promoting paperless work environments, INNOCEAN contributes to resource circulation and waste reduction. INNOCEAN specifically promotes recyclable separation, personal cup usage instead of paper cups, and personal toothbrush cups to reduce daily waste generation and water consumption. Additionally, various eco-friendly campaigns encourage voluntary employee participation in sustainability efforts.

INNOCEAN office, designed as an eco-friendly workplace

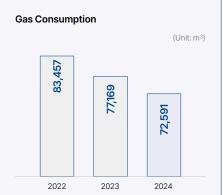

Green Life Practices

INNOCEAN promotes eco-friendly awareness among employees by introducing green lifestyle practices under the themes of "Walk, Reduce, Turn-Off, and Collect." The "Walk" initiative encourages walking for short distances and using public transportation; "Reduce" focuses on minimizing printed reports and food waste; "Turn Off" promotes the habit of switching off PCs when not in use; and "Collect" emphasizes using personal toothbrush cups and water-saving—each action reinforcing sustainable habits in everyday life.

Provision of Tablet PCs for a Paperless Work Environment

To reduce waste from paper documents and create a smart working environment, INNOCEAN provides tablet PCs to all employees. Additionally, INNOCEAN produced and distributed the "Work Smart Guidebook: A Smart Way to Use a Tablet" to help employees quickly adapt to this new work setup and fully embrace a paperless office culture. Eco-friendly paper is also used in printed materials such as diaries and calendars.

01 Human Rights Management

Mid- to Long-Term Strategy for Human Rights Management

At INNOCEAN, we rigorously uphold our Human Rights Charter, which is aligned with international standards and guidelines on human rights, labor, and diversity. We are committed to respecting the rights of all stakeholders—including employees, clients, partners, and local communities—and continue to make dedicated efforts to safeguard these rights across our value chain. In particular, INNOCEAN is committed to enhance its human rights management system in alignment with its human rights principles and to create sustainable, people-centric value through responsible corporate practices.

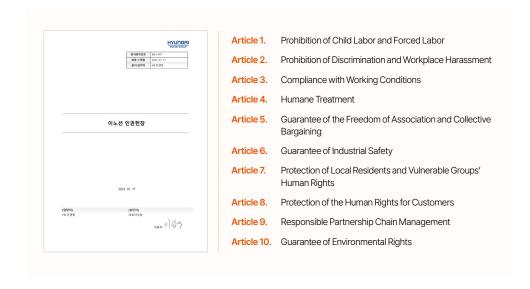

01 Human Rights Management

Human Rights Charter

INNOCEAN has established and proclaimed a Human Rights Charter to prevent potential human rights violations in its business operations and to minimize human rights-related risks. This Charter abides by various international standards, including the Universal Declaration of Human Rights, the UNGPs (UN Guiding Principles on Business and Human Rights), the ILO Constitution, and the OECD Guidelines for Multinational Enterprises and Due Diligence Guidance, and implements human rights management actively based on these principles. INNOCEAN's Human Rights Charter is applicable to all domestic and overseas subsidiaries, including their employees, and further encourages its stakeholders, such as partners, to respect the Charter as well.

INNOCEAN Human Rights Charter

Human Rights Management System

To implement human rights management systematically, INNOCEAN closely monitors and manages the progress of various human rights-related initiatives through committees and management meetings involving top decision-makers or heads of relevant departments, as well as working-level meetings led by the dedicated human rights management team. The Corporate Strategy Team 2 is responsible for the enactment and revision of the Human Rights Charter, development of action plans, and risk assessments based on human rights due diligence. The HR Support Team oversees the operation of complaint handling systems, internal training, and external communications, thereby playing an active role in advancing human rights management. In addition, INNOCEAN has built internal systems to address company-wide human rights risks and regularly evaluates these risks, sharing the results transparently with stakeholders. Through human rights due diligence, potential risks are identified in advance, and in the event of any issue, corrective actions are taken promptly to resolve the risks at an early stage.

Basic Principles of INNOCEAN Human Rights Charter

ESG Core Value

Reinforcement of Social Responsibility Management

01 Human Rights Management

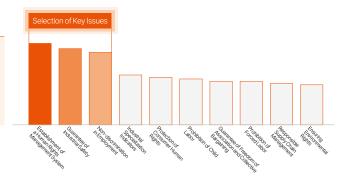

Human Rights Impact Assessment (HRIA)

In 2025, INNOCEAN conducted its first Human Rights Impact Assessment, with employees participating in a survey designed to assess the company's internal human rights practices. The assessment covered two relevant departments and evaluated 10 key human rights areas, focusing on issues that employees may have experienced directly or indirectly. The results showed a 98.3% implementation rate for INNOCEAN's human rights-related systems. However, the assessment identified potential risks in the areas of 'Establishment of a Human Rights Management System', 'Guarantee of Industrial Safety', and 'Non-discrimination in Employment'. To address these risks, INNOCEAN has developed targeted mitigation measures and improvement plans for identified human rights deficiencies.

Results of Deriving Major Human Rights Issues

Level of implementation of HRIA results

Improvement Tasks by Area

Category	Improvement Task	Details
Establishment of a Human Rights Management	Conduct human rights assessments regularly	Establish a human rights impact assessment framework to identify and manage human rights risks Develop and implement step-by-step improvement plans to address identified human rights risks
System	Revise the human rights charter	Specify the scope and content of the Human Rights Charter Disclose the revised Human Rights Charter internally and externally
Guarantee of Industrial Safety	Establish a process to ensure occupational safety for partners	Develop a practical monitoring process to ensure occupational safety for employees of partner companies
Non-discrimination in Employment	Establish non- discrimination policies for foreign workers	Develop non-discrimination policies and implementation guidelines for foreign workers Disclose non-discrimination policies for foreign workers internally and externally

Human Rights Education

To enhance employees' understanding of human rights and effectively communicate the direction of the company's human rights management, INNOCEAN conducts human rights training. In 2024, the training focused on "trends and changes in human rights" and the "expansion of human rights management." Moving forward, INNOCEAN will continue to expand its human rights training to raise awareness among employees and prevent discrimination at the workplace.

Human Rights Education Brochure

Creating a Great Workplace and 10 Codes for Preventing Sexual Harassment

INNOCEAN is strengthening its preventive efforts and has developed and distributed the "Creating a Great Workplace" guide, aimed at fostering an organizational culture centered on mutual respect, consideration, and effective communication. In addition, INNOCEAN has established the "10 Codes for Preventing Sexual Harassment" to raise awareness of sexual harassment among all stakeholders, including employees. These codes highlight real-life examples of sexual harassment from four perspectives—victim, perpetrator, bystander, and manager, providing employees with balanced and practical response strategies.

10 Codes for Preventing Sexual Harassment

Verbal sexual harassment is more serious

Same-sex harassment is also sexual harassment

Resolve the problem actively once you recognize it

Empathy is the first step to the remedying the situation

Your negligence as colleagues is more harmful

Sexual harassment is a human rights issue

Managers in charge can become secondary perpetrators

If you hold back, it will turn into a bigger issue

Appearance is not to be judged at the workplace

Intoxication is not an excuse for any harassment

01 Human Rights Management

Human Rights Grievance Process

INNOCEAN operates a grievance process to proactively prevent and address human rights risks across all stakeholders, including employees. We maintain both online and offline channels such as the Human Rights Violation Reporting System, the Ethics Management Channel on the intranet, and the Grievance Counseling Center. Complaints reported through these channels are handled fairly and promptly in accordance with internal procedures and standards. If a human rights violation is reported, relevant departments assess the nature of the issue, review possible response measures, and ensure appropriate remedies are provided. From 2022 to 2024, there were no reported or filed cases related to human rights violations. We strictly safeguard the confidentiality of all reports—protecting the identities of victims and whistleblowers, the details of the grievance, and the outcomes of the resolution process—to ensure trust and protection for those involved.

Human Rights Grievance Handling Process

Monitoring

· Grievance received through reporting channels, etc.

Number of Human Rights Grievance Reports in 2024

- · Refer to internal regulations, similar cases in the past, and other industry practices related to reporting human rights violations, and seek the best possible remedy with the assistance of a labor consultant
- In cases where human rights violations significantly impact the freedom and rights of victims and where there is a high possibility of reputational risk for the company
- The Ethics Committee performs deliberations and decides on the level of personnel action, reports to top management, and implements measures to assist victims and determine the level of personnel action to be taken against perpetrators
- · Conduct regular monitoring of victims to prevent recurrence

Process for Reporting and Addressing Workplace Bullying and Sexual Harassment

ESG Core Value

INNOCEAN operates a dedicated grievance channel to receive reports related to bullying and sexual harassment at the workplace. Cases reported through this channel are processed fairly and transparently in accordance with clear internal procedures. Under the whistleblower protection policy, all reports are kept strictly confidential, and necessary protection measures—such as identity protection and exemption from liability—are provided to

In 2024, 2 reports related to workplace bullying and sexual harassment were received through official and other channels. INNOCEAN will continue to strive toward fostering a healthy organizational culture focused on proactive prevention.

01 Human Rights Management

D&I (Diversity and Inclusion) Policy

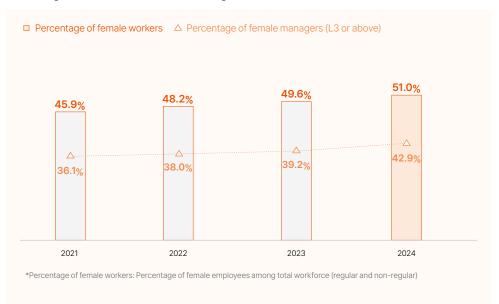

INNOCEAN has established a "D&I (Diversity & Inclusion) Policy" to foster an inclusive organizational culture where diverse talents with creativity and a spirit of seeking challenge can grow together. We do not discriminate against employees based on gender, race, ethnicity, nationality, disability, age, gender identity, religion, political beliefs, social background, or any other reason, and put continuous efforts to foster a culture that respects differences. INNOCEAN is also striving continually to improve the work environment so that employees from diverse backgrounds can embody the values of inclusion and diversity. We will also strive to consistently reflect these values in relationships with all stakeholders, including clients, partners, and local communities.

Employee Diversity Status To enhance diversity within the organize

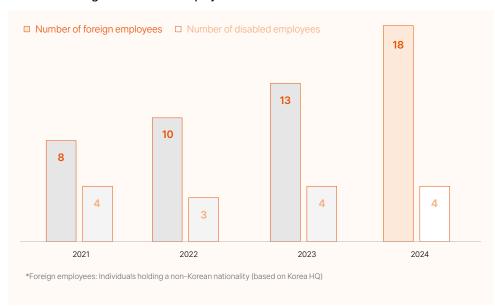

To enhance diversity within the organization, INNOCEAN continues to expand the employment of female talent. As a result of these efforts, the percentage of female managers and employees has increased over the past three consecutive years. As of 2024, the number of female employees reached 484, marking an 8% increase compared to 2023.

In addition, INNOCEAN is steadily increasing the number of foreign employees. As of 2024, INNOCEAN had 18 foreign employees, which is more than doubled compared to 2021. INNOCEAN will continue to invest in and focus on enhancing employee diversity and inclusion moving forward.

Percentage of Female Workers and Managers

02 Human Resources Management

INNOCEAN's Human Resources Goals

INNOCEAN refers to all its employees as "Innocians" to foster pride and a sense of belonging, thereby building an organizational culture centered on people. Guided by the philosophy of "a company that works with joy and grows together," INNOCEAN continues to expand welfare programs aimed at enhancing employees' quality of life, including family-friendly benefits, flexible working hours, and flexible work arrangements. Furthermore, grounded in a culture of diversity and inclusion, INNOCEAN respects generational, gender, and value-based differences among its employees, supports diverse work styles, and facilitates personal and professional development. Amid the accelerating trends of digital transformation and creative collaboration, INNOCEAN is advancing its work environment with a focus on Employee Experience (EX), ensuring balance between work and life and implementing responsible talent management for sustainable growth.

Selected as a Top Job-Creation Company in 2024

INNOCEAN

INNOCEAN was selected as Korea's "Top Job-Creation Company" in 2024, following its recognition in 2023, in acknowledgment of its achievements in creating quality jobs, including expanding youth employment and increasing the number of female employees.

Talent Recruitment

INNOCEAN has completely renewed its recruitment website and newly launched a global page to secure top talent through a variety of platforms, including university job fairs and both online and offline recruitment sessions. In 2024, INNOCEAN participated in the "2024 ADD JOB Festival" organized by the Korean Advertising Society and the Korea Association of Advertising Agencies. At the Festival, INNOCEAN introduced experiential & conversion internship programs, provided tailored one-on-one consulting such as feedback on resume and portfolio, and offered career counseling for international students. In addition, INNOCEAN hosted special lectures for future advertising talents, sharing the latest industry trends and practical insights to enhance participants' understanding of the advertising field.

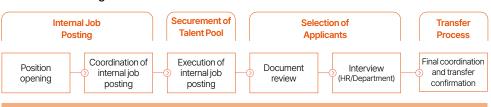

2024 ADD JOB Festival

Internal Job Posting

INNOCEAN operates an internal job posting system to empower employees to demonstrate their capabilities and pursue self-directed growth. Employees can apply for various projects and roles based on their interests and expertise, while the company enhances organizational vitality by placing the right talent in the right positions. INNOCEAN will continue to support employee growth and strengthen organizational competitiveness through this system.

Internal Job Posting Process

Employee Training Program

INNOCEAN operates a 4-track employee training program to support the mutual growth of its employees and the company. Designed to meet the demands of a rapidly evolving era, the program nurtures marketing creators with competencies in both practical skills and broader capabilities such as leadership and digital literacy. The "Competency Track" focuses on strengthening job-specific skills, while the "Leadership Track" offers training tailored to position and tenure, supporting new employees in adapting to the organization. The "Digital Track" enables employees to understand the latest digital transformation (DX) trends and develop relevant capabilities. The "Skill Track," targeting all employees, provides practical learning opportunities such as compliance training and attendance at advertising festivals. We provide a range of supplementary training programs for staffs dispatched for overseas, including job-specific and language courses, online vocational education content, and telephonebased foreign language program.

02 Human Resources Management

Soft-landing for New Employees

INNOCEAN operates various types of "soft-landing programs" to help new and experienced employees adapt quickly to the organization and fully demonstrate their capabilities. New employees undergo a 2-week onboarding program that allows them to build a basic understanding of the company and foundational skills, followed by S-OJT (Structured Onthe-Job Training) in departments that collaborate with their assigned teams. They are further supported in adapting to actual job and achieving consistent career growth through mentoring programs and "Junior Training Week." At the end of the first year, INNOCEAN holds networking events with executives, and in the second year, group visits to advertising festivals strengthen employees' sense of belonging to the organization. For experienced employees, onboarding includes an orientation session (HiNNOcean), a dedicated introduction course (INNOschool), and a mentoring program for early adaptation.

Domestic and Overseas Educational Programs

INNOCEAN supports domestic and international education and field programs to enhance employee insight and provide exposure to creative trends. In 2024, employees were given opportunities to directly participate in major global events such as Cannes Lions, MWC (Mobile World Congress), SXSW (South by Southwest), Spikes Asia, MAD Stars (Busan International Advertising Festival), and DMS (Digital Marketing Summit), allowing them to gain first-hand experience of the latest marketing trends and innovation cases. Following the events, observation reports are shared across the company and online sessions are held to disseminate knowledge, contributing to company-wide capability development.

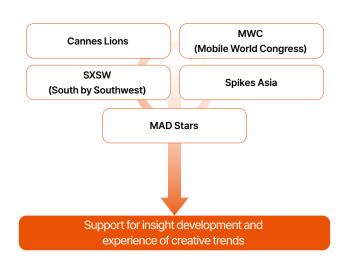

Digital Competency Enhancement Training

INNOCEAN also provides job-specific internal training to strengthen employees' professional and digital competencies. Job training is offered across Planning, Production, and Media, structured by level of difficulty. Digital training is divided into 6 programs to enhance practical skills. While primarily conducted offline, digital training is also available as online content. In line with its business strategy, INNOCEAN has also designed and implemented generative AI training programs as well as internal lectures, including job-specific Al bootcamps and Al Day. Each quarter, INNOCEAN invites external experts to share the latest industry trends and practical insights, and supports job-related content and language programs through various external learning platforms. Furthermore, INNOCEAN provides financial support for education expenses to foster a self-directed learning environment tailored to individual learning needs.

2024 Domestic and Overseas Experience Program

Operation of Job-centered Training

02 Human Resources Management

Degree Support Program

INNOCEAN operates a program to support employees pursue MBA degrees and overseas training at prestigious universities to motivate employees and expand opportunities for growth. Outstanding talents are selected through an internal open application process and are provided with tuition and related expenses to complete MBA programs at leading domestic and international universities. INNOCEAN will continue its ongoing talent development activities to nurture creative talents who will lead the future of the company through degree support program.

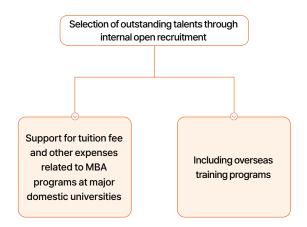

Leadership Program

Recognizing leadership development as a core element of sustainable growth, INNOCEAN offers a variety of leadership programs, including training for newly appointed team leaders, training for those promoted, basic and advanced coaching programs, one-on-one intensive coaching, and group coaching for team leaders. The curriculum is designed to strengthen leadership competencies of managers, nurture next-generation leaders, and enhance intergenerational understanding, thereby improving the communication and leadership culture across the organization.

Program Effectiveness Evaluation

To assess the effectiveness of its training programs, INNOCEAN collects and manages data on training satisfaction. Following the completion of each program, INNOCEAN assesses satisfaction level based on content relevance, instructor expertise, training delivery, and learning environment. The results are systematically analyzed and reflected in the continuous improvement of the training programs.

02 Human Resources Management

Fair Compensation

INNOCEAN operates a personal annual salary system to establish a fair compensation structure, applying fixed and variable pay metrics based on performance. The fixed salary is determined within a set budget, taking into account management performance, market and economic conditions, and is paid according to individual performance ratings. The variable pay is incorporated to share a portion of the company's operating profit with employees, thereby enhancing the rationality of compensation in alignment with profit growth. Various reward programs are also in place to recognize and encourage performance, boosting employee morale and motivation.

Award System

Performance Evaluation Process

INNOCEAN uses multiple evaluation methods including performance competency assessments, promotion reviews, and 360-degree leadership evaluations to ensure fair and comprehensive employee assessment. We also implement multi-rater feedback for managerial roles to develop leadership capabilities.

Performance Evaluation System

- Annual performance evaluations using "MBO (Management By Objective)" and competency assessments based on position and job role
- Ongoing performance tracking and 1:1 meetings throughout the year via the performance management system
- Continuous performance management training for evaluators

- Conducting 360-degree leadership assessment once a year
- 360-degree leadership assessment by self, supervisor, and members
- Assessment results linked to leadership training and coaching programs
- Performing fair promotion reviews of employees reaching the required tenure for their level based on individual evaluations
- Granting special promotion reviews and opportunities for accelerated promotion for high-performing employees

Labor-Management Council

INNOCEAN recognizes the importance of building a healthy labor-management relationship for sustainable growth and operates the "BRAVO Committee," a labor-management council. The BRAVO Committee, comprising executives and employee representatives, meets quarterly and engages in in-depth discussions on topics such as productivity improvement, HR system enhancements, handling of employee grievances, and welfare promotion. Issues raised through the committee are reviewed and applied company-wide. Moving forward, we will continue to build an "INNOCEAN where employees want to work" based on mutual trust and cooperation between labor and management.

"BRAVO Committee"

02 Human Resources Management

Employee Communication Programs

INNOCEAN conducts employee engagement programs to strengthen company-wide communication and encourage exchanges. Town Hall Meetings are held to share key achievements and strategic direction between division leaders and team members, fostering a stronger sense of belonging. Team-based activities such as the "Birkman Workshop" and "Cultural Afternoon" are organized to promote teamwork and enhance organizational engagement. In 2024, communication opportunities were further expanded through events such as the 19th anniversary celebration "1NNO 9OAT" and the year-end gathering "Wish you a magical 2025."

Horizontal Culture

INNOCEAN is committed to building a "Great Workplace" and cultivating a culture that promotes horizontal communication and individual creativity. To this end, the hierarchical and complex job grade system has been simplified to "Manager (L1-L2)" and "Senior Manager (L3)," creating an environment where open communication is encouraged regardless of job grade.

Organization Culture Diagnosis

Since 2017, INNOCEAN has conducted the group-led Culture Survey to assess the organizational culture and identify areas requiring improvement. In 2024, INNOCEAN's overall "Culture Index" score increased by 2.73% compared to the previous year. Survey results are shared with top management and team leaders. At the organizational level, interviews are conducted with team leaders and Change Agents (CA) to gain deeper insights into employee needs. These findings are used to identify cultural issues and analyze their root causes. INNOCEAN will continue to diagnose the organizational culture and develop practical improvement measures to create a work environment where employees can thrive.

INNOCEAN Rest & Recharge

Since 2015, INNOCEAN has been fostering a healthy and happy work culture through the "INNOCEAN Rest & Recharge" program. Through initiatives like "Happy INNO Day" and "Happy INNO Week," INNOCEAN provides a vacation calendar that allows employees to use their annual leave freely around holidays and long weekends, encouraging a culture of voluntary time off. Additionally, INNOCEAN offers various rest support programs such as encouraging time off for managers and allowing personal leave in connection with overseas business trips. INNOCEAN will continue to expand its flexible work systems to help employees maintain work-life balance and enhance work efficiency.

03 Safety and Health Management

Safety and Health Management System

INNOCEAN places the highest priority on safety and has established a safety and health management guideline to build a secure workplace by integrating "Safety (awareness)" and "Security (infrastructure)." In 2024, INNOCEAN obtained both the ISO 45001 certification for safety and health management systems and the KOSHA-MS certification, becoming the first company in the domestic advertising industry to achieve both. In 2025, INNOCEAN plans to further advance its safety and health management practices by focusing on ensuring the safety of both employees and partner employees across production environments and operational processes.

Safety and Health Management Initiatives

Aiming to achieve "Zero Serious Accidents," INNOCEAN is reinforcing a site-oriented safety management system based on risk assessments. Through practical application of the safety and health management system, INNOCEAN strives to prevent serious accidents and rigorously control risk factors in the field. To foster a collaborative safety culture with employees of partner companies, INNOCEAN has established detailed initiatives for the special management of high-risk worksites and for strengthening the safety and health capabilities of its partners, thereby addressing potential safety risks proactively.

Safety and Health Management Goals and Initiatives

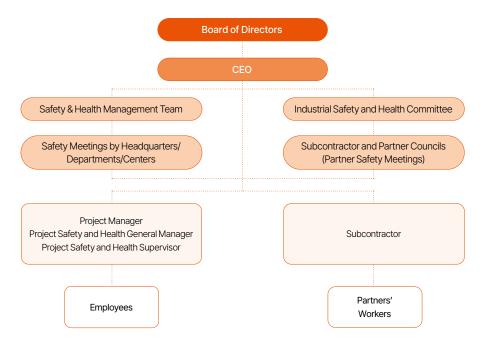

03 Safety and Health Management

Safety and Health Management Organization

The Chief Executive Officer (CEO) serves as INNOCEAN's safety and health management officer and general manager. In this capacity, the CEO reviews and makes decisions on key matters related to safety and health management. The Safety and Health Management Team, reporting directly to the CEO, operates as the workinglevel organization and oversees safety incidents not only at headquarters but also at external sites such as advertising shoots and exhibitions. When carrying out production projects, INNOCEAN establishes subcontractor and partner councils and strives to strengthen shared safety awareness through regular safety meetings.

INNOCEAN Safety and Health Governance

Industrial Safety and Health Committee

INNOCEAN has established and operates the Industrial Safety and Health Committee to ensure safety, health, and a pleasant working environment for its employees. The Industrial Safety and Health Committee, composed of five members representing the management and five members representing workers, discusses and reviews key matters related to safety and health. The committee holds meetings once every quarter to review and approve plans for prevention of industrial accidents and discuss safety and health management regulations, thereby establishing an institutional foundation for creating a safe working environment.

03 Safety and Health Management

Revision of Safety Management Manual

Since establishing the Production Safety Management Manual in 2022, INNOCEAN has made two revisions and continues to implement it in daily operations. Employees can access the manuals for each work area, including CX, video shooting, and outdoor advertising, through the company intranet. Additionally, to ensure that all personnel participating in production sites can work in safe environments, INNOCEAN identifies risk factors at production sites and proposes risk elimination, substitution, and control measures while establishing implementation plans.

INNOCEAN Production Safety Management Manual

Enhancement of Safety and Health Expertise

ESG Management

The dedicated Safety and Health Department at INNOCEAN has completed specialized training in risk assessment and acquired qualifications as internal auditors for the Safety and Health Management System. Three employees developed competencies to conduct practical risk assessments on site through training that includes understanding risk assessment and industry-specific evaluation exercises. Furthermore, in 2024, all members of the Safety and Health Management Team obtained national technical qualifications related to safety and health, thereby enhancing the professionalism of INNOCEAN's safety and health management significantly.

Safety and Health-related Certifications

Establishment of Safety Management Process

INNOCEAN operates a systematic safety management process to respond proactively to potential safety accidents at advertising production sites and business locations. Under a prevention-oriented management system, INNOCEAN conducts preemptive safety training to minimize the likelihood of accidents and ensure workers' safety. INNOCEAN will continue to strengthen the establishment of a safety culture by consistently planning and executing safety initiatives.

Establishment of the Safety Management System

Joint Labor-Management Safety Declaration Ceremony

In April 2024, INNOCEAN held a "Joint Labor-Management Safety Declaration Ceremony," pledging to establish a safety culture that prioritizes the safety and health of all stakeholders, including employees and partners. During the ceremony, INNOCEAN shared its achievement of becoming the first company in the advertising industry to acquire both ISO 45001 and KOSHA-MS certifications and reaffirmed its commitment to building a safe working environment throughout the company.

Joint Labor-Management Safety Declaration Ceremony

03 Safety and Health Management

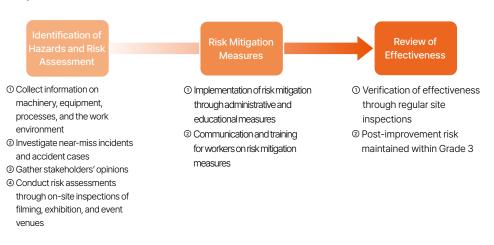

Safety and Health Risk Assessment

INNOCEAN emphasizes establishing a prevention system based on self-regulation through reforming risk assessment as one of its four key strategies for reducing industrial accidents. To manage safety and health risks, INNOCEAN conducts risk assessments at headquarters, permanent business sites, filming locations, and exhibition and event venues. Since 2023, checklist-based assessment forms have been applied to all projects. Before commencing work, partners conduct risk assessments to identify potential hazards and implement corrective measures for any identified hazard. In 2024, to enhance the effectiveness of existing risk assessment results, evaluation reports from 11 sites were reexamined. A total of 244 hazardous risk factors were identified, and 37 additional corrective actions within INNOCEAN's scope were completed. As a result, the risk level improved from Grade 3 (7.2) before corrective action to Grade 2 (3.1) afterward, demonstrating the effectiveness of the prevention system.

Emergency Response Procedures for Industrial Accidents

INNOCEAN has established systematic emergency response procedures to respond swiftly and effectively to various emergencies that may occur at production sites. In the event of emergencies such as fires or worker injuries, the project safety and health supervisor and the partner's on-site manager respond immediately according to pre-established procedures to minimize damage.

03 Safety and Health Management

Emergency Response Training for Accidents

INNOCEAN has established safety response procedures and training scenarios to ensure a swift and systematic response to emergencies that may occur at production sites. In the event of incidents such as fires, collisions, falling objects, or falls at filming or production sites, the emergency response team carries out initial fire suppression, rescue operations, and recovery activities promptly to minimize personal injury. Regular training sessions are conducted to continuously raise safety awareness among employees.

Emergency Response Drill Training

Employee Health Management

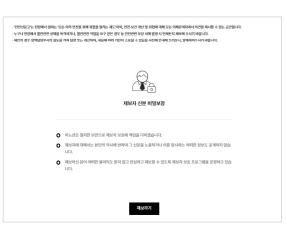

INNOCEAN operates comprehensive health check-ups and psychological counseling programs to support employees with health management and disease prevention. Annual comprehensive health examinations are provided on a regular basis, along with the "Happy Counseling" program to support employees' psychological stability and emotional well-being. This program is available not only to employees themselves but also to their family members, offering up to eight professional counseling sessions per year on a range of topics including interpersonal relationships, work, organizational life, family, and legal matters. For individuals classified as highrisk (Level 4 or higher) based on expert assessment, we provide additional counseling sessions. All counseling is conducted in strict confidentiality. INNOCEAN has reported zero cases of employee injury due to illness over the past three years.

Operation of the Safety Shinmungo

C Safety Shinmungo Channel

INNOCEAN operates "Safety Shinmungo", a communication channel through which employees can freely report potential hazards in the workplace and working environment. If an unsafe condition or task is observed, or if a potentially dangerous situation arises, stakeholders can report the matter via Safety Shinmungo. INNOCEAN ensures the reporter's identity is strictly protected to prevent any disadvantage resulting from the report, and uses this communication channel to enhance on-site safety standards.

Safety Reporting Channel

03 Safety and Health Management

Safety Management Process for Exhibitions and Events

When carrying out production work with partners, INNOCEAN ensures that all parties clearly understand and comply with each stage of the safety management process in accordance with the Safety Management Manual. In particular, INNOCEAN assesses the safety management capabilities of each partner and proceeds with projects only with qualified firms, thereby ensuring safety at production sites. The safety management capabilities of each partner and proceeds with projects only with qualified firms, thereby ensuring safety at production sites. The safety management capabilities of each partner and proceeds with projects only with qualified firms, thereby ensuring safety at production sites. a year for registered partners, and non-registered partners are also required to undergo the same evaluation as needed per project. Only partners who achieve Level 5 (average) or higher on the 7-category evaluation criteria are eligible to participate in production, which helps strengthen the collaborative safety and health management system with partners. INNOCEAN will continue to enhance its safety management systems to further strengthen safety in production

Partner Safety Management Process

03 Safety and Health Management

Partner Safety and Health Support

In 2025, INNOCEAN strengthened safety standards at production sites by updating its existing Safety Management Manual to reflect changes in external policies and incorporate key elements of the Serious Accident Reduction Roadmap. To enhance the practical implementation and effectiveness of the revised manual, customized on-site training was conducted for executives and field personnel of partners, and application of the manual is being closely monitored on a project-by-project basis.

Partner Safety Compliance Pledge

INNOCEAN also promotes safety and health management among its partners by obtaining pledges on compliance with safety rules. In 2024, during the Joint Labor-Management Safety Declaration Ceremony, 45 partners participated in the safety compliance pledge, representing 87% of INNOCEAN's major partners.

Safety Compliance Pledge

On-Site Production Safety Management Activities

Safety Management Plan

Check the Safety Management Plan before starting on-site work

- · Prepare two types of plans according to the nature and scale of the project
- · Include designations of the safety and health supervisor and on-site supervisor, safety education plans, identification of risk factors, and preventive measures

On-Site and Equipment Safety Inspections

Conduct routine safety inspections of the work environment and equipment

- · Monitor movement and lighting conditions continuously
- · Install safety facilities in areas identified as vulnerable

Worker Safety Education

Conduct safety education before work begins to prevent accidents

- Provide training tailored to the specific characteristics of the on-site work
- · Educate workers on emergency response protocols and procedures
- · Provide guidance on the use of personal protective equipment according to the type of work

Complete supervisor training

- · Conduct training in accordance with the Occupational Safety and Health Act
- Display certificates of completion and designation letters at the production site

Partner Safety Briefings

In 2024, INNOCEAN held safety briefings with 11 key partners to share the company's strengthened safety management standards. Through these briefings, INNOCEAN introduced the risk grading management system, partner safety capability evaluations, safety council operations, and enhanced site safety standards. Real-life cases were also shared. INNOCEAN will continue to expand safety and health support activities for its partners, aiming to grow together.

04 Information Security and Privacy Protection

Mid- to Long-term Road Map of Information Security and Privacy Protection

INNOCEAN has established a mid-to-long-term roadmap to enhance information security and privacy protection, and set phased action plans to systematically strengthen its security capabilities. Through this, INNOCEAN aims to advance its enterprise-wide information security and privacy protection framework to improve its ability to respond to external security threats and to create a secure working environment.

Mid- to Long-term Road Map of Information Security and Privacy Protection

2024 2025~

Establishment of foundational capabilities for information security and privacy protection

· Establishing and implementing a framework for privacy protection activity

Reorganization of information security and privacy protection systems

- · Conducting privacy protection consultina
- Reorganizing the organizational structure for privacy protection
- Revising privacy protection policies and guidelines
- · Establishing a self-assessment
- Carrying out employee engagement activities for privacy protection awareness

Advancement of information

security and privacy protection

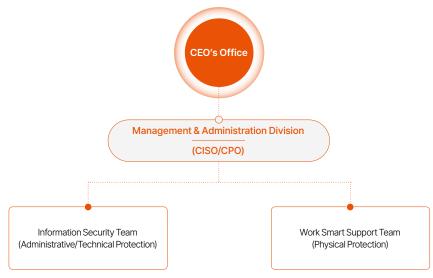

- Systematizing privacy protection management framework
- · Introducing detection and leakage prevention solutions for privacy protection

Information Security Organization

A Chief Information Security Officer (CISO) is appointed and entrusted with responsibilities including the establishment, implementation, and improvement of information security plans, as well as the identification and assessment of information security risks. In addition, INNOCEAN operates a designated information security department responsible for the planning, executing, evaluating, and improving security tasks, along with the Information Security Committee, which performs deliberations and coordinates overall information securityrelated matters. The information security department conducts training for both internal and external personnel responds to information security issues arising from service operations, and verifies compliance with relevant security policies and guidelines.

The Information Security Committee holds regular meetings once a year to review internal management plans related to information security and privacy protection, coordinate incident response and recurrence prevention measures, and review the improvement and advancement of information security measures and systems.

Information Security Governance

04 Information Security and Privacy Protection

Information Security Policy

To enhance information security, INNOCEAN has established security policies and guidelines that reflect relevant laws such as the Act on the Promotion of Information and Communications Network Utilization and Information Protection, and the Personal Information Protection Act, as well as standards based on its business environment and the ISMS-P (Personal Information & Information Security Management System). These policies define the actions that employees and business-related personnel must follow to effectively safeguard information assets, and include 14 detailed behavioral quidelines covering areas such as personnel security, risk management, and PC security management.

Information Security Education

INNOCEAN conducts company-wide annual training sessions to raise awareness of information protection among its employees. The training covers essential topics such as information security policies and guidelines, relevant laws and compliance requirements, major security incident cases and measures to prevent recurrence, and other core knowledge necessary for the stable operation of information systems. Additionally, simulation exercises on phishing email are conducted to promote security awareness among employees and to minimize the risk of incidents caused by negligence or intent. New employees are provided with separate training on information security and privacy protection, allowing all members to perform their tasks on the same security basis.

Information Security Training Completion Rate

Information Security Investment

To prevent cyber attacks and data breaches, INNOCEAN reviews the implementation level of security systems at its workplaces and has made targeted investments to strengthen its security response capabilities. Currently, INNOCEAN operates and manages 28 security systems across areas including data leakage and intrusion prevention, protection of personnel and assets, network security, system security, and endpoint security. In 2025, INNOCEAN plans to establish additional systems for vulnerability assessment and monitoring and will continue its investments toward building a stable information security infrastructure.

2025 Information Security Investment Plan

Vulnerability Check

· Reviewing the adoption of a continuous vulnerability scanning solution for web and infrastructure

Security Monitoring

Reviewing the adoption of a SIEM (Security Information and Event Management) solution

Encryption

Reviewing the adoption of a database encryption solution

Response to Information Security Incident

INNOCEAN's information security personnel monitor security systems continuously to identify signs of breaches. In the event of an incident, they assess the extent of the damage and carry out system recovery procedures. System administrators apply regular security updates and, in the case of a breach, take immediate action to block and respond to the incident, thereby preventing further damage. When a security incident occurs, a detailed analysis of the causes is conducted and a report is submitted to the responsible manager and the CEO. The findings are then used to develop measures to prevent recurrence of similar incidents.

Information Security Incident Response Process

Prevention of Safety Incidents

- Conduct vulnerability checks at least once a year
- · Apply security updates · Establish communication systems and training

Detection and Reporting of Security Incidents

Detect and report security incidents by security monitoring personnel, system administrators, information security officer, and other employees

· Report incidents to the information security manager

Security Incident

- Take actions upon detection of intrusions
- Analyze security incidents Recover from security incidents

Post-Incident Management

 Prepare incident reports Implement post-incident measures

ESG Core Value

Reinforcement of Social Responsibility Management

04 Information Security and Privacy Protection

Operation of Information Security System

For a structured response to information security incidents, INNOCEAN has established a comprehensive system composed of 6 security domains to protect the organization from both internal and external information security threats.

INNOCEAN applies information security systems to the PCs of both internal employees and external personnel. This includes device management, controls for internet and wireless networks, antivirus protection, prevention of unauthorized software use, application of security patches, physical security measures, control of portable storage devices, email security, access control, and PC maintenance process — all aimed at safeguarding confidentiality of data.

To protect critical information assets in offices and server rooms from damage, theft, and leakage, INNOCEAN enforces physical security controls. Designated security officers are responsible for planning physical security measures and monitoring server rooms and reporting, and manage sites thoroughly by establishing restricted zones, controlling the movement of equipment.

managers and document administrators. Department heads are responsible for the storage, alteration, access, and disposal of confidential documents, while document administrators classify documents by importance and assign access rights based on user roles.

Additionally, to prevent data

leakage through printed materials

and removable media, INNOCEAN

designates departmental security

Physical Security

Document and Media Security

Establishment of an Information Security Incident Response System

Development Security

PC Security

INNOCEAN is committed to safeguarding information during the development and operation of applications by both internal personnel and external contractors. Relevant personnel, including developers, carry out security measures such as change request reviews and vulnerability assessments. Security risks at each stage, from development to operation, are analyzed thoroughly to reinforce the overall security framework.

Human Resources Security

To prevent security incidents involving both internal employees and external personnel, INNOCEAN applies human resource security system at the time of hiring and termination. This includes annual signing of security agreements, security notifications via the intranet, mandatory information protection and ethics training, and management of access rights.

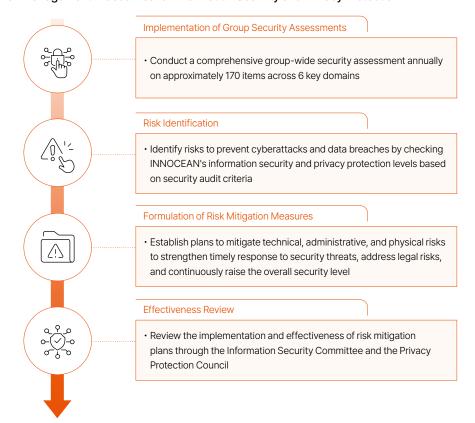

Cloud Computing Service Security

INNOCEAN also ensures the security of cloud computing services provided to employees and external users by establishing legal-based security requirements, which are stipulated in contracts and other documentation. In addition, INNOCEAN strictly supervises the implementation of security measures such as incident response, confidentiality, secure deletion of information assets, and post-contract protection.

Identification and Management of Information Security and Privacy Protection Risks

In line with the growing sophistication of cyber threats and the company's overall security enhancement strategy, INNOCEAN continuously evaluates its security and privacy measures across 6 areas: investment, human resources management, security level, ICT operations level, implementation of group ICT policies, and incident response. Through group-level security audits, INNOCEAN identifies potential risks, formulates and implements mitigation plans, and manages their effectiveness.

Risk Management Procedures for Information Security and Privacy Protection

ESG Core Value

Reinforcement of Social Responsibility Management

04 Information Security and Privacy Protection

Privacy Protection Organization

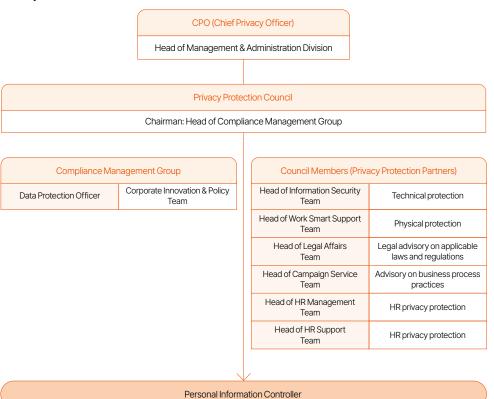

INNOCEAN has established a Privacy Protection Council centered around the Chief Privacy Officer (CPO) and the responsible department to oversee and control all matters related to privacy. The privacy protection department operates relevant regulations and guidelines, conducts regular training for employees to ensure the safe handling of personal information, and manages a self-assessment process to support personnel in complying with legal requirements throughout the privacy lifecycle.

Privacy Protection Policy

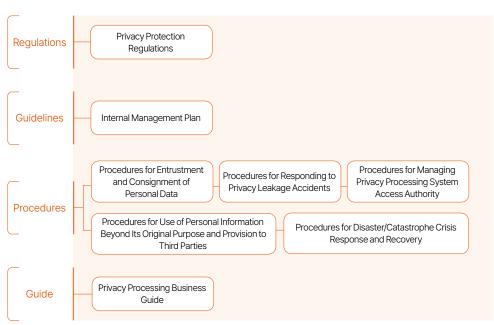

Privacy Protection Policy

INNOCEAN has developed an internal management plan based on the Personal Information Protection Act and its enforcement decree, and has established regulations, guidelines, procedures, and guide to safeguard privacy processed within the company. All policies related to privacy protection are shared with employees through the company intranet.

Privacy Protection Governance

INNOCEAN Privacy Protection Policy

04 Information Security and Privacy Protection

10 Principles of Privacy Protection

INNOCEAN has established 10 internal principles for privacy protection and encourages all employees to follow and apply these principles in their daily work through training and awareness campaigns.

01	Collect only essential personal data	Obtain consent when collecting additional information Provide notice of the four required items when collecting and using personal data
02	Obtain separate consent or ensure legal basis for collecting sensitive data	Resident registration numbers cannot be processed even with the data subject's consent
03	Process personal data securely through encryption	Unique identifiers, passwords, and biometric data must be stored in encrypted form Set passwords on documents and files containing personal data before saving
04	Allow third-party sharing only with consent or legal grounds	Notify 5 required items when obtaining consent for third-party provision Using personal data beyond the original purpose of collection or providing it to third parties without proper justification is prohibited
05	Strictly manage access rights to personal data processing systems	Assigning different levels of access according to responsibilities, retaining records of access permissions for at least three years, operating password rules, etc.
06	Access logs must be retained for at least one year and reviewed monthly	If handling data of more than 50,000 individuals, or processing unique identifiers or sensitive information, retain logs for a minimum of 2 years
07	Security measures such as internal management plans, firewalls, and antivirus software must be implemented	Prevent data breaches through protective measures against hacking and unauthorized access Keep antivirus software up to date Avoid opening suspicious phishing emails or downloading attachments from unknown sources
08	Prepare the document and strictly manage and supervise trustees when outsourcing personal data	Execute a standard data processing contract and confidentiality agreement Conduct regular audits and training for subcontractors, and document the results
09	Personal data must be destroyed once the use of personal information is over	Immediately dispose of personal data upon fulfillment of its collection purpose Obtain a non-retention confirmation from (re)entrusted parties
10	In the event of a data breach, the data subject must be notified without delay	If a personal data breach is recognized, notify the data subject within 5 days via written notice, phone, or e-mail

Privacy Protection Training

Introduction

To raise awareness regarding privacy protection, INNOCEAN conducts training once a year for all employees. Additionally, monthly card news is provided to enhance understanding of privacy practices and promote appropriate protective measures.

04 Information Security and Privacy Protection

Self-Check Process for Privacy Protection

INNOCEAN operates a self-check process system for the protection of privacy. When a campaign is created by a staff in charge in the ERP system, the system automatically sends notification emails in accordance with the personal data handling status. Corporate Innovation & Policy Team then provides legal guidance and consultation to ensure compliance with applicable regulations. Through the self-check process, staffs can comply with the necessary procedures at each stage of collecting, processing, and destroying personal information, ensure the rights of information subjects, and take measures to ensure safety. Meanwhile, we will systematize the evidence materials management function in 2025 to efficiently manage evidence materials for privacy protection requirements.

Self-Check Procedure for Privacy Protection

Management of Privacy Entrustment and Delegation

When INNOCEAN is entrusted with the processing or handling of privacy, it conducts compliance checks in accordance with the data controller's inspection procedures and reports the results. Additionally, INNOCEAN fulfills its legal obligations regarding subcontractors by posting required checklists and inspection results related to privacy protection on the Partners Portal.

Response to Privacy Breach and Leakage Incidents

INNOCEAN reports any suspected or confirmed privacy breach promptly to the responsible privacy manager of the relevant department. We respond promptly in accordance with the manual, based on the type of personal information processor. The staff in charge assesses the occurrence and scope of the data breach and reports the findings to the Chief Privacy Officer (CPO). Simultaneously, the staff notifies relevant authorities, cooperates with investigations, and formulates measures to prevent recurrence based on cause analysis. The CPO oversees the entire response process and leads a rapid response team to ensure timely and effective mitigation of the incident.

Privacy Policy

INNOCEAN has established a Privacy Policy in accordance with the Personal Information Protection Act to protect users' privacy and rights, and to facilitate the smooth handling of user complaints related to privacy. This policy is publicly available on the company's website. The policy includes the purpose of privacy processing, retention period, terms of provision to third parties, procedures for outsourcing of privacy processing, and disposal of personal information. INNOCEAN processes privacy for various purposes as defined in this policy and does not use the data for purposes other than those stated. Privacy is retained from the time of collection until the purpose is achieved and is immediately deleted once the purpose is fulfilled. Customers have the right to freely request access, correction, or deletion of their privacy managed by the company. To guarantee these rights, the policy clearly defines the rights and obligations of data subjects and implements various measures to ensure the security of privacy.

ESG Core Value

Reinforcement of Social Responsibility Management

04 Information Security and Privacy Protection

Overseas Subsidiaries Risk Management

While legal and regulatory frameworks vary by country, INNOCEAN supports the management of privacy protection risks for its overseas subsidiaries by operating global customer information and protection guidelines centered on fundamental principles. These guidelines include a self-assessment checklist that allows each subsidiary to evaluate its management system and employees' awareness levels.

Performance and Activities for Privacy Protection

In 2024, INNOCEAN conducted professional consulting to identify areas requiring improvement in strengthening privacy protection. Based on the findings, INNOCEAN revised privacy policies and guidelines, established governance structures, implemented new processes, and developed supporting systems. In 2025, INNOCEAN aims to further enhance its privacy protection framework through expert training sessions, revisions to the privacy policies on each website, awareness-raising activities, systemization of evidence materials management function, and the introduction of privacy protection solutions.

Privacy Protection Management Achievements and Plans

Established a privacy protection management system through professional external consulting

Revised and updated internal regulations, management plans, five procedures, and one guideline

Formed a Privacy Protection Council under

(Corporate Innovation & Policy Team, Information Security Team, Legal Affairs Team, etc.)

Identified privacy processing operations and processors across all departments

Provided self-check support and task guidance emails based on data handling status

Initiatives for 2025

Conduct external expert training on privacy protection (in addition to mandatory legal training)

Amend and integrate privacy policies across INNOCEAN's main website. Partners Portal. etc.

Continue to operate other promotion and guidance activities, such as card news, key press releases, surveys

Paper-based management of evidence materials related to handling privacy

→ Implement electronic self-check and management via the ERP system

INNOCEAN's Mutual Growth

Four Key Commitments for Mutual Growth

— Four Key Commitments

INNOCEAN has adopted and practices the "Four Key Commitments for Mutual Growth between Large Enterprises and SMEs" established by the Korea Fair Trade Commission (KFTC), in order to foster a fair business environment and ensure compliance with subcontracting regulations. Fairness and transparency are upheld as top priorities in all transactions with partners.

Four Key Commitments for Mutual Growth

Fair Contracting Practices

Fair contracting practices for mutual growth between large enterprises and SMEs

We promote equitable business practices by defining contractual guidelines that fairly reflect the interests of partner companies and prevent any infringement of the principle of freedom of contract.

Partner Selection and Management

Partner selection and management

We enhance transparency and fairness in the selection and management of our partners, thereby contributing to a fair subcontracting environment.

Establishment and Operation of the Internal **Subcontract Review Committee**

○ ○ Internal Subcontract Review Committee establishment and

We contribute to the fair subcontracting order by deliberating on the fairness and legality of subcontracting transactions of a certain size or larger by ourselves in advance.

Issuance and Retention of Written **Documents**

Written documentation and recordkeeping in subcontracting

We contribute to the creation of a fair subcontracting culture by promoting proper documentation practices and implementing robust policies throughout the subcontracting process.

Adoption of Mutual Benefit Regulations and Standard Subcontract Agreements

To achieve mutual growth with partners and prevent violations of the Subcontracting Act, INNOCEAN has established and complies with the Mutual Benefit Regulations. These regulations stipulate standards for the selection and management of partners, strategies for collaboration with SMEs and rural communities, and quidelines for operating the Subcontract Review Committee. In addition, INNOCEAN applies the standard subcontract agreement recommended by the KFTC, specifically tailored to the advertising industry, for all subcontracting arrangements, thereby promoting balanced and equitable business practices.

Adoption and operation of standard subcontract agreements for the advertising industry

Applied to all subcontract agreements

Fostering a culture of fair contracting between large enterprises and SMEs

05 Sustainable Partnership Chain Management

Shared Growth Programs for Partners

INNOCEAN systematically promotes eight key shared growth initiatives, including support for capacity-building, recruitment support, management support, financial support, support for sales expansion, technology protection, employee welfare, and open communication to ensure sustainable collaboration with its partners. Each initiative is designed to enhance partners' competitiveness and contribute to building a healthy advertising industry ecosystem and long-term partnerships.

Partner Capability Enhancement

Overseas Participation Program

INNOCEAN shares its creative experience and ideas with partners to strengthen long-term competitiveness. To enhance partners' global creative capabilities, INNOCEAN supports them with participation in international advertising festivals and industry exhibitions. Participation in events, which was previously centered around agencies, has been extended to partners, allowing them to gain insights and understand trends in actual industry sites. Going forward, INNOCEAN will continue to provide opportunities to attend global events across various fields such as ATL (TV commercials) and BTL (exhibitions and events), thereby contributing to the enhancement of partners' practical capabilities and creative thinking.

The support scope has been expanded to include family members of partners' employees as well. In the event of a bereavement involving partners' employees, INNOCEAN provides condolence wreaths and funeral supplies based on the same standards applied to its own employees. In 2024, about KRW 13 million worth of funeral supplies were provided to 25 partners. INNOCEAN also operates a vacation support program called "Healing Camp," It offers opportunities for family-based glamping vacation, including lodging, BBQ, and campfire kits. In 2024, the Healing Camp was held twice, inviting a total of 28 partners, with support costs amounting to approximately KRW 17 million.

Healing Camp for Partners' Employees and Their Families

Partner Cultural Life Support

Creative industries grow and thrive based on culture. INNOCEAN supports partner employees' cultural life to help them enhance their creative capabilities as well as their understanding of content and trends.

Partner employees are offered opportunities to attend movies and exhibitions to enrich their cultural experiences. In 2024, 4,000 movie tickets were provided to 200 partners, supporting about 48 million won worth of movies. In addition, 2,000 exhibition tickets for the Kansong Art Museum were given to 100 partners, amounting to support valued at approximately KRW 33 million.

Partner Communication

INNOCEAN creates various opportunities for active exchange and communication with partners. Through regular events and two-way communication, INNOCEAN actively reflects partners' opinions and seeks to foster a culture of mutual growth based on trust and empathy.

The annual "Partners Day" is a key communication activity aimed at strengthening cooperation with partners. In 2024, a total of 71 companies and 126 partner employees participated in Partners Day. The event included presentations on mutual growth programs for partners and shared INNOCEAN's management vision. Additionally, special lectures on related industry technologies and global trends were held to share insights that support the enhancement of partners' capabilities for strategic thinking and creative planning.

INNOCEAN operates various communication channels to listen to partners' voices. Regular visits and ad hoc consultations are conducted for the company to understand partners' concerns, and a VOC (Voice of Customer) reception desk is maintained via the INNOCEAN website and KakaoTalk channel to sustain ongoing communication. INNOCEAN will continue to actively collect partners' feedback through two-way communication.

Partner Reward Programs

INNOCEAN rewards partners and their employees who achieve outstanding results. Annual awards are given to excellent employees of partner companies to enhance work engagement and encourage long-term retention. During the 2024 Partners Day, one company with excellent ESG performance and five companies with outstanding mutual growth achievements were selected and each awarded KRW 5 million. This initiative encourages partners' ESG management and mutual growth activities.

05 Sustainable Partnership Chain Management

Partnership Chain ESG Management

Partner Selection

INNOCEAN operates a fair and transparent partner selection process by clearly defining the criteria for partners. Employees' opinions are collected and reviewed in the process of forming the partner pool. The final decisions are made by the CEO. Through this process, the appropriateness of partners is reviewed and confirmed annually.

Partner Selection Process

New Partner Registration Evaluation

Companies wishing to register as INNOCEAN partners are selected based on a total score calculated from quantitative evaluations, which take into account production records, employees status, and financial status, and qualitative evaluations, which assess portfolios, drafts, quality, and work capabilities. The specific weighting of qualitative and quantitative evaluations is announced at least 30 days prior to the start of the registration review, considering the number of companies to be recruited each year. In particular, for selection of new partners, INNOCEAN confirms whether the partner has received a "normal" or higher rating from a certified safety and health evaluation agency, and contracts are concluded only with partners that meet the required safety and health competency level.

Partner Evaluation and Management

INNOCEAN's partner evaluation applies a 50% weighting to project evaluations and regular evaluations, and grants additional points by assessing management status, safety and health, and ESG levels.

Partner Evaluation and Management System

05 Sustainable Partnership Chain Management

Partnership Chain ESG Management

Partner ESG Management Process

INNOCEAN has established a Partnership Chain ESG Policy to enhance the ESG capabilities of its partners. Partners are classified and managed based on strategic importance and ESG risks. ESG management levels are assessed through checklist-based self-assessments, and key partners are required to receive on-site audits and customized ESG consulting. For partnership chain risks identified through ESG assessments, mitigation measures are established, and the implementation of corrective actions and their outcomes are monitored continuously. INNOCEAN will continue to expand ESG evaluations and consulting to strengthen mutual growth with a broader range of partners.

Partner ESG Management Process

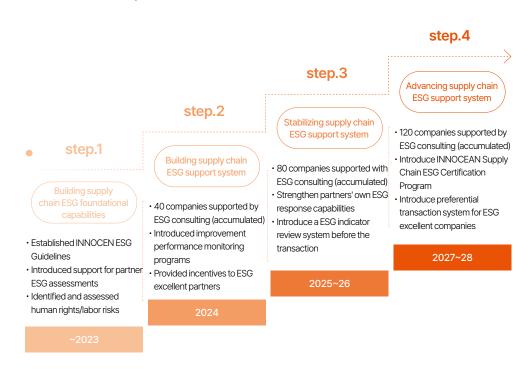

- 1) Based on annual transaction amount and project evaluation excellence
-) Considering industries with high risks related to human rights and labo

Mid- to Long-Term Plan for Partner ESG Management

In 2023, INNOCEAN became the first company in the advertising industry to sign an agreement with the Korea Commission for Corporate Partnership to support partner ESG initiatives. Since then, it has developed internal guidelines for partners' ESG implementation and supported ESG-related training and consulting programs. Partners demonstrating strong ESG performance are incentivized in selection for the mutual growth program to promote voluntary participation and broader dissemination of results. In 2024, ESG self-assessments and onsite audits were conducted for 20 key partners, and improvement consulting was provided. The average ESG compliance rate improved from 31.1% before consulting to 82.3% afterward. Of the evaluated partners, 18 were recognized by the Korea Commission for Corporate Partnership as companies with excellent ESG performance.

Creating social value through the establishment of a sustainable ESG management system Attaining sustainable shared growth by fostering trust among stakeholders

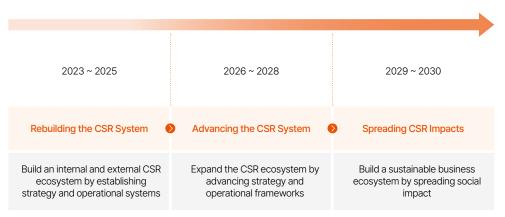

Mid-to-Long-Term CSR Roadmap

INNOCEAN has developed a mid-to-long-term CSR roadmap with milestones up to 2030, and carries out social contribution activities in alignment with this plan. INNOCEAN has designated the period up to 2025 as a phase for establishing its CSR strategy and operational framework. Following this, INNOCEAN aims to advance its CSR system, broaden the scope of its social contribution activities, and ultimately expand its social impact.

ESG Core Value

INNOCEAN's CSR Roadmap

INNOCEAN's CSR Implementation Principles

Social Impact First

INNOCEAN CSR will prioritize the expansion of social impact.

We will strive for shared growth with local communities and work toward expanding our initiatives beyond Korea to the global stage.

Solution for Sustainability

INNOCEAN's CSR will take a datadriven approach to identify the root causes of issues, design solutions proactively, and address societal challenges.

By leveraging our diverse resources and capabilities, we will focus on creating sustainable solutions rather than one-off contributions.

Sharing Together

INNOCEAN and its members will work together to actively engage in solving social problems.

We will foster a culture of voluntary participation among employees and build a community-oriented corporate culture that generates social value through our resources and expertise.

Reinforcement of Social Responsibility Management

06 Social Contribution

Sharing Bazaar (fundraising) for Children with Cancer

INNOCEAN hosts an annual charity fundraising event, the "Sharing Bazaar," for its employees. By 2024, the bazaar had been held 17 times. In the 2024 event, approximately 4,000 items, including advertising props and personal belongings donated by employees were sold through direct sales and auctions. The total proceeds of KRW 20 million were donated to support the treatment of children with pediatric cancer. Moreover, over 2,650 items were donated to the Beautiful Store.

INNOCEAN Sharing Bazaar Activities

<Life-saving Bathhouse>, a Space Rebranding Campaign

INNOCEAN is implementing a space rebranding project to identify and revitalize spaces needed by vulnerable groups. As the first case, the Iljuk Bathhouse in Anseong, Gyeonggi Province was fully remodeled and redesigned into a safety-centered facility for the elderly. The space has been structured to prevent major causes of accidents such as heat shock and falls. In addition, public health education sessions and guidebooks were provided to local residents to promote a safe bathing culture. This project reflects INNOCEAN's customer experience design capabilities. In addition, open-source materials containing spatial rebranding know-how are planned for release. INNOCEAN will continue to breathe new life into neglected spaces and realize social value through creativity.

Life-saving Bathhouse

Iliuk Bathhouse

Hosting S.O.S Program

Since 2011, INNOCEAN has hosted the "S.O.S (Social Problem Solver)" university contest program to foster future talent in advertising and marketing. The program provides marketing experience and scholarships to university students aspiring to become marketers. In 2024, based on the theme "Ideas for a Better World in the Age of Al," the contest invited proposals aimed at enhancing the daily lives of vulnerable groups and supporting digital/Al marginalized populations through AI technology. A total of 13 works were selected and the grand prize was awarded to a winner who proposed "AITM," a system using Al-based heart rate analysis for prevention of financial crimes. The winner received 10 million KRW in prize money and an internship opportunity.

S.O.S Program Awards Ceremony

Building Junrangcheon Wildlife Sanctuary

To mark Endangered Species Day designated by the Ministry of Environment, INNOCEAN carried out a volunteer activity to establish a wildlife protection zone in the Jungnangcheon area. In 2024, new employees participated in activities such as planting saplings, creating forest areas that will be the sanctuary and protection zone for wildlife, and providing rice grains as food for migratory birds.

CSR Partnership Groups

Certified as an Excellent Institution in Culture and Arts

First in the Advertising Industry to be designated as an "Excellent Institution for Culture and Arts Sponsorship" from the Ministry of Culture, Sports and Tourism

INNOCEAN was the first company in the advertising industry to be designated as an "Excellent Institution for Culture and Arts Sponsorship" in acknowledgment of its contributions to fostering a sustainable culture and arts ecosystem. Awarded by the Ministry of Culture, Sports and Tourism and organized by the Arts Council Korea, the designation is an annual certification given to companies and institutions with outstanding records in culture and arts sponsorship. INNOCEAN was selected based on high scores across criteria such as "organizational capability and operational system," "sponsorship outcomes," "awards received over the past three years," and "new sponsorship initiatives."

CSR Utilizing INNOCEAN's Core Competencies

ESG Management

Leveraging its unique creative and design capabilities, INNOCEAN carried out a space rebranding CSR project to transform lijuk Bathhouse, a 27-year-old outdated public bathhouse in Anseong, Gyeonggi-do, into "the safest bathhouse in the world." The project incorporated healthcare-based technologies and comprehensively applied INNOCEAN's expertise in spatial design, brand goods development. Going beyond simple facility renovation, this initiative implemented a solution focused on social value by linking safety with everyday life in the local community.

Global Design, Proven Through Advertising Awards

Starting with the "Urban Design of the Year" award in 2024, the project went on to win prestigious global honors such as the Red Dot Design Award, The One Show, and Clio Awards—demonstrating both INNOCEAN's impact in social value creation and its global creative excellence.

Establishing a Sustainable Structure Through Community Collaboration

INNOCEAN has established a sustainable, community-based CSR framework in collaboration with the Anseong-si, Iljuk-myeon, the Anseong Health Welfare Social Cooperative, the Gyeonggi-do Social Impact Creators, and World Vision. The project extended beyond rebranding of physical spaces to include localized programs such as safety and health education, distribution of proper bathing guides, health screenings for the elderly, and escorted bathing services. These measures are contributing meaningfully to expanding resident participation and promoting a culture of safety. Such efforts go beyond short-term outcomes, positioning the initiative as a sustainable social contribution model that grows alongside the local community.

Throughout INNOCEAN's coordination of various stakeholders and joint projects, INNOCEAN has given the impression that its efforts go beyond just surface-level initiative commonly seen at the corporate level, staying engaged to create meaningful contributions to the community.

Board of Directors

INNOCEAN has refined its governance framework to ensure transparent and independent decision-making. The board is composed of members with expertise and diversity, enabling checks and balances across the overall management process and establishing a foundation for efficient business operations. Moving forward, INNOCEAN will continue to operate the board from an ESG perspective and foster a culture of responsible decision-making.

Board Organization

Board Composition

INNOCEAN's Board of Directors consists of a total of seven directors: three internal directors, three independent directors, and one other non-executive director. Independent directors make up 43% of the board, meeting the requirements under commercial law and reinforcing independent management oversight and monitoring functions. The chairman of the board concurrently serves as the CEO to enhance operational efficiency of the board and practice accountable management. INNOCEAN also appoints directors with diverse backgrounds and expertise to ensure decisions reflect a broad range of perspectives.

Board Policy

— Board Regulations — Corporate Governance Charter

Corporate Governance Report

INNOCEAN established Board Regulations in 2015 to advance corporate governance and ensure efficient board operations. According to these regulations, INNOCEAN's Board of Directors, which is the company's highest decision-making body, oversees and approves major business matters, considering the diverse interests of stakeholders including shareholders, investors, customers, employees, and partners. In 2024, INNOCEAN introduced the Corporate Governance Charter to further strengthen advanced corporate governance. Through this charter, INNOCEAN continues to pursue a governance system that reflects its organizational culture while securing transparency, soundness, and stability in management, aiming to enhance shareholder value and protect rights and interests through checks and balances.

Board Performance

In 2024, the board was convened a total of seven times and discussed a variety of agenda items. Regular board meetings are held on a quarterly basis, with additional ad hoc meetings convened as necessary. Agenda materials are provided five days in advance to allow directors ample time for review, and scheduling takes into account directors' availability to ensure high attendance. The board recorded an average attendance rate of 100% in 2024, with a total of 16 agenda items reported and resolved.

Board Expertise

INNOCEAN supports the board's decision-making and supervisory functions by assisting independent directors through the Investor Relations Team. Comprising four members, the Investor Relations Team provides independent directors with management data and information, responds to requests, and offers administrative support to ensure effective performance of their duties. In addition, each committee is paired with designated internal departments and organizations to deliver efficient and practical operational support to independent directors.

Board Diversity

INNOCEAN is committed to enhancing board diversity by appointing Ratio of Female Directors directors with diverse professional expertise and backgrounds. In selecting candidates, INNOCEAN considers not only educational background, industry experience, and functional expertise, but also broader elements of diversity such as gender, ethnicity, and culture in order to strengthen the board's diversity and enable balanced decision-making. In 2024, INNOCEAN reinforced board diversity by increasing the number of female directors from one to two.

Board Independence

INNOCEAN strives to strengthen the board's independence and thereby establish transparent governance. The board is authorized to request submission of relevant materials, conduct investigations, and report on matters where violation of laws or the Articles of Incorporation is suspected. Director appointments are finalized at the shareholders' meeting following board recommendations, conducted with fairness and independence. When appointing independent directors, the board reviews conflicts of interest, independence, and qualification requirements, obtains qualification confirmation certificates, and reports them to the Korea Exchange. All current independent directors meet these standards, helping the company enhance the board's eligibility and transparency continuously.

01 Governance and Risk Management

Audit Committee

INNOCEAN operates an Audit Committee despite no legal obligation to do so, and the committee's independence and objectivity are ensured by appointing only independent directors as members. The Audit Committee includes at least one accounting and financial expert. In 2024, the Audit Committee convened five times, with a 100% attendance rate for independent directors.

Sustainability Management Committee

In 2023, INNOCEAN established the Sustainability Management Committee under the Board of Directors. The committee consists of three independent directors and one internal director, with the CEO participating as the internal director. The committee supports transparent internal transactions, protects shareholder rights, and ensures the effective implementation of key ESG issues such as social responsibility and safety and health. The Sustainability Management Committee also provides prior consultation on major decisions, including medium- to long-term planning, before board meetings.

Board Compensation

INNOCEAN compensates its directors within the limits approved at the general shareholders' meeting. For internal directors, the board determines compensation, including base salary and performance-based incentives based on position, tenure, duties and performance, contribution level, revenue, operating profit, and overall internal and external management conditions.

Independent directors are paid fixed remuneration only, in order to ensure independence and transparency, with no additional performance-based compensation. If future evaluation outcomes for independent directors are deemed relevant to compensation, the board will assess various factors comprehensively and determine their inclusion following sufficient discussion.

Shareholder Status

As of December 31, 2024, INNOCEAN's total issued common stock amounts to 40,000,000, with minority shareholders holding 30.42% of the total stock. The largest shareholders, Sungyi Chung and four related individuals, collectively hold 11,495,778 shares, which represents 28.74% of the shares outstanding. Significant institutional investors include NHPEA IV Highlight Holdings AB, holding 17.20%, and Baring Asset Management, with a 7.59% stake. Additionally, Lotte Holdings Co., Ltd. and Lotte Shopping Co., Ltd. each possess 5.15%, contributing to a combined total of 10.30%. The National Pension Service holds 8.28%, along with other pension funds that also maintain substantial investments, thereby supporting the stability of stock prices.

Return to Shareholders Policy

Since its listing in 2015, INNOCEAN has continuously increased dividend amounts to enhance shareholder value. The scale of shareholder dividends is determined by comprehensively considering the company's investments for sustainable growth, business performance, and controlling interest net income based on consolidated financial statements. The dividend payout ratios for the last three years were 60.9% in 2022, 46.2% in 2023, and 46.9% in 2024, with a three-year average payout of 51.3%. While we continue to invest in long-term growth, we uphold a dividend policy that aligns with our current operations and global industry standards, ensuring that shareholder value is maximized.

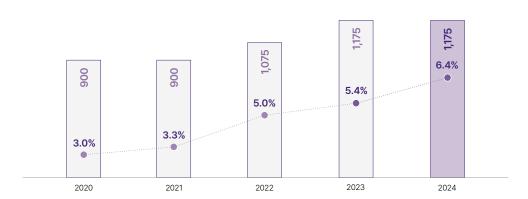

Quarterly Dividend Performance and Target

To maximize shareholder value, INNOCEAN has consistently paid quarterly dividends for three consecutive years since 2021. At the end of November 2023, we issued a 100% stock dividend, allocating one new common share for each existing share, increasing the total number of common shares from 20,000,000 before issuance of the stock dividend to 40,000,000 after issuance of the stock dividend. We have maintained an earnings per share (EPS) of KRW 1,500 since our listing, and we aim to achieve an EPS of KRW 3,350 by 2026, representing a 90% increase from 2022, to enhance long-term shareholder value. Prioritizing the expansion of shareholder value continues to be our foremost strategic objective.

Protection of Shareholder Rights

INNOCEAN has operated an electronic voting system annually since 2020 to enable shareholders to exercise their voting rights more conveniently. To ensure sufficient time for review of shareholder meeting agenda items, notices for meeting convocations are issued at least four weeks in advance. The 2024 Annual General Meeting was scheduled to avoid peak dates and thereby enhance accessibility and convenience for shareholders.

Strengthening of Shareholder Communication — Dividend Inquiry Service — IR Website

INNOCEAN holds annual Analyst Days and corporate performance presentations to transparently share management status, financial goals, and shareholder return policies with shareholders and investors. Additionally, results of voting at shareholder meetings and dividend-related information are disclosed transparently via INNOCEAN's IR website and the electronic disclosure system (DART). In 2024, INNOCEAN conducted over 91 conferences and investor meetings domestically and internationally, maintaining active communication and disclosing information transparently. Notably, at year-end, INNOCEAN replaced postal distribution of dividend payment notices with an online dividend inquiry service accessible on the company's website, reducing paper usage and contributing to environmentally friendly management.

Dividend Inquiry Service

2024 Analyst Day

INNOCEAN held the "2024 Analyst Day," covering industrial changes driven by AI, trends in the advertising industry, and goals and strategies for sales expansion in the CX (Customer Experience) sector. INNOCEAN hosted the 2024 Analyst Day at "KIA Unplugged Ground," a 926m² electric vehicle-focused complex cultural space, providing expert lectures on Al and industry trend changes, and presenting the company's strategies to respond to these changes, thereby strengthening communication with shareholders. INNOCEAN plans to hold Analyst Days regularly to present specific strategies and goals and to communicate its commitment to enhancing corporate value.

2024 Analyst Day

01 Governance and Risk Management

Identification of Key Risks

INNOCEAN categorizes risks arising throughout its business activities into financial risks and non-financial risks. Financial risks are managed as financial business risks, while non-financial risks are divided into four detailed categories: environment and safety, legal affairs, personal information, and greenwashing. Key risks are addressed through close communication among relevant departments in an integrated manner, and related policies and plans are established for systematic management. INNOCEAN conducts ongoing monitoring of each risk item to manage risks proactively, developing various scenario plans to minimize damage in the event of risk occurrence. Additionally, INNOCEAN strictly complies with applicable laws and regulations regarding potential financial and non-financial risks, and no violations have been identified during monitoring to date.

Financial and Non-Financial Risks

Category	Classification	Key Contents
Financial	Finance & Business	Review of financial stability including credit, interest rates, taxes, etc.
Environment & Safety Review of risks due to fire/sa		Review of risks related to greenhouse gas emissions and waste, etc.
		Review of risks due to fire/safety accidents, etc.
		Review of risks related to compliance with laws and regulations
	Personal Information	Review of customer personal information leaks and data security accidents
	Greenwashing	Pre-inspection and monitoring of greenwashing risks for productions

Risk Management Governance

INNOCEAN has established a continuous monitoring system to manage financial and non-financial risks through the Board of Directors, Audit Committee, and Sustainability Management Committee for systematic and proactive management of risks.

Financial risks are identified, assessed, and proactively managed by the Finance & Accounting Management Division, which addresses potential market and credit risks. The identified financial risks are overseen by the Audit Committee.

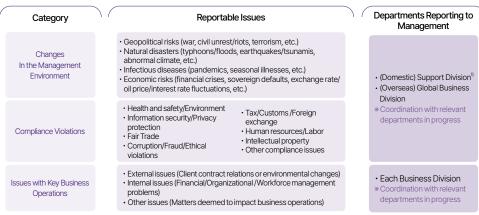

Non-financial risks are analyzed by the Compliance Management Group and the Corporate Strategy Division, focusing on safety, legal affairs, and privacy. These functions reflect legal trends and prioritize the management of safety and information security risks. In addition, INNOCEAN strengthens response capabilities through employee training, and the identified non-financial risks are overseen by the Sustainability Management Committee. INNOCEAN will continue its efforts to strengthen its integrated risk management system aligned with international standards.

Risk Reporting Process

INNOCEAN has clearly defined company-wide risks threatening business continuity and established management and reporting processes to prepare proactively against such risks. Key reportable risks are classified into changes in the business environment, compliance violations, and issues with business operation; consultations and joint responses are conducted with relevant departments before reporting to management.

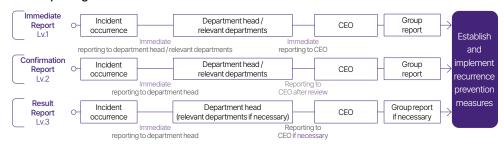

When reportable risks occur, INNOCEAN follows a group risk reporting process to ensure comprehensive response and establishment of recurrence prevention measures. Considering the impact on the company's creditworthiness or business continuity, group reporting is conducted in three stages: immediate report, confirmation report, and result report.

Risk Reporting Targets

¹⁾ Support Division refers to the Compliance Management Group, Finance & Accounting Management Division, Management & Administration Division, and Corporate Strategy Division, with the reporting division determining the appropriate department for handling

02 Compliance and Ethical Management

Ethical Management

Reporting

Channels

INNOCEAN has established and operates an ethics management framework to embed compliance and ethical management into its organizational culture and ensure that ethical practices are upheld in all stakeholder relationships. Guided by the vision of "Becoming a leading global company trusted and respected for the practice of ethics management," INNOCEAN reorganized and systematized its ethics management system from 2022 to 2023, and focused on expanding the ethics management culture in 2024. INNOCEAN defines the three core elements of ethics management as ethics regulations, awareness-building activities, and systems and compliance oversight bodies. Based on this, it conducts specific activities such as the revision of ethics regulations and guidelines, training and communication programs for employees and partners, system operations, and compliance audits.

02 Compliance and Ethical Management

Ethics Charter and Code of Conduct

INNOCEAN has established an Ethics Charter to fulfill its corporate responsibilities and build trust with diverse stakeholders. All members of INNOCEAN are required to comply with this Ethics Charter. The Z.T.P (Zero Tolerance Policy) consists of four fundamental principles that all employees must follow strictly, reflecting a firm commitment to hold accountable anyone who violates these principles without exception. Additionally, to support the practical application of the Ethics Charter, we provide Anti-Corruption Ethical Management Practice Guidelines, which specify employees' codes of conduct across various areas including employee ethics, fair trade and competition, realization of customer value, respect for employees, and pursuit of sustainability.

INNOCEAN's Compliance and Ethical Management Regulations System

INNOCEAN's 5 Ethics Charter Clear and Transparent Standards: We execute our duties based on clear and transparent standards, fulfilling our responsibilities with sincerity and excellence. 02 — Fair Competition and Transactions: We engage in fair competition in the market and treat all contractual partners equitably. Realization of Customer Value: We provide safe products, outstanding services, and accurate information, while diligently safeguarding privacy. Respect for Employees: We recognize each member as an independent individual, ensuring fair working conditions and a safe work environment. Sustainable Development: As a global corporate citizen, we actively contribute to sustainable development, enabling various stakeholders to prosper together by fulfilling our social responsibilities.

Four Principles of Z.T.P (Zero Tolerance Policy)

Environmental protection Social contribution	Donations and sponsorships
	stakeholders / Abuse of authority Conflict of interest Insider trading Anti-trust / Collusion Unfair competition / Intellectual property rights Providing complete information Human rights / Prevention of bullying and sexual harassment at the workplace Environmental protection

02 Compliance and Ethical Management

Anti-Corruption Regulations

INNOCEAN has established and operates the Anti-Corruption Regulations to ensure faithful compliance with anti-corruption laws across all business areas. These regulations cover anti-corruption activities, prohibited acts, reporting of violations and protection of the informant, and disciplinary standards, offering practical guidance to employees for effective implementation of the anti-corruption management system within the organization.

Prohibited Acts under the Anti-Corruption Regulations O1 — Accepting money or valuables from stakeholders in relation to duties, or causing stakeholders to provide such benefits to third parties. O2 — Providing money or valuables to stakeholders or third parties related to them for improper purposes. O3 — Abusing one's position or authority, or violating laws to seek benefits for oneself or a third party. O4 — Causing financial loss to the company through violation of laws in the use of the company's budget, acquisition/management/disposal of assets, or conclusion and execution of contracts, by intention or gross negligence. O5 — Making improper solicitations to stakeholders. O6 — Engaging in acts that, while not explicitly covered above, violate applicable laws or internal regulations and may be deemed corrupt by social norms.

Partner Code of Conduct

INNOCEAN has established a Partner Code of Conduct to build a sustainable partnership chain, encouraging partners to strictly comply with all applicable laws governing corporate business activities. Partners are required to uphold best practices in the areas of ethics, environment, labor and human rights, health and safety, and management systems.

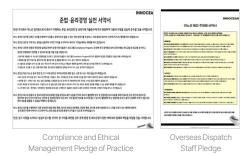

INNOCEAN Partner Code of Conduct

Employee Pledge of Practice

INNOCEAN collects an annual Compliance and Ethics Pledge of Practice from all employees. In 2024, 100% of the targeted 862 employees took the pledge. Additionally, dispatched staff at overseas subsidiaries are required to submit a Dispatched Staff Pledge once a year, which covers ethical standards, mutual respect, and accounting integrity.

2024 Ethics Pledge Status

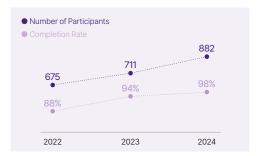

Ethical Management Training

To strengthen awareness of compliance and ethical management, INNOCEAN provides ethics training programs to employees. Video-based training is actively utilized to ensure employees can complete the training regardless of time and location. In 2024, training efficiency was enhanced through improved content and multilingual versions, facilitating compliance and ethics training across overseas subsidiaries.

Ethical Management Training Courses

Training Title	Training Target	Training Frequency	Training Type
Basic Training	All employees	Once a year	Online
Promotion Training	Promoted employees, newly appointed team leaders	Upon promotion or new appointment	Online
New Dispatch Staff Training	Newly dispatched staff	Upon assignment	In-person

Compliance and Ethical Management Campaigns

INNOCEAN conducts ongoing compliance and ethics campaigns to raise employees' awareness and promote an ethical corporate culture. INNOCEAN distributes the Anti-Corruption Ethical Management Practice Guidelines and regularly uploads various compliance and ethics-related content to the company intranet. Additionally, letters requesting cooperation in practicing compliance and ethical management are sent to partners. An intranet community, which employees can access at all times, provides regulations, guidelines, training materials, and updates. Through these efforts, INNOCEAN aims to promote a culture of compliance and ethical management

Unethical Behavior Reporting Channels

To foster the practice of compliance and ethics and prevent potential risks, INNOCEAN operates a whistleblowing system and educates both employees and external stakeholders to ensure they are aware of and can freely access the reporting channels. The reporting system supports internet-based reporting of violations related to fair trade laws, ethical management, and system improvements related to INNOCEAN, and users can also check the results of their reports

INNOCEAN operates an internal whistleblower protection program, upholding three key principles of "confidentiality," "protection of identity," and "mitigation of responsibility" to ensure the protection of reporters.

Legal Compliance Officer

INNOCEAN has appointed a legal expert as the Legal Compliance Officer, pursuant to a resolution of the Board of Directors. The Legal Compliance Officer conducts training on key laws for employees, provides guidance to prevent legal violations and works to establish compliance management system. Additionally, the officer analyzes quarterly trends in the enactment and amendment of core laws that may impact business operations and communicates updates to relevant departments to minimize legal risks.

Key Activities of Legal Compliance Officer in 2024

Frequency	Initiatives	Inspection and Outcome
On-going	Compliance inspection on legal issues	On-going legal advices
As-needed	Identification of high-risk areas	Development and dissemination of compliance guidelines for 10 major laws
Monthly	Compliance training for employees (document-based)	Publication of educational materials on major legal issues (e.g., Legal Insights. etc.)
Bi-monthly	Compliance training for employees (in person)	Training on four compliance risks and business-related regulations
Quarterly	Analysis of trends in the enactment and amendment of laws	Analysis of trends in the enactment and amendment of 34 business-related laws and notification to relevant departments

02 Compliance and Ethical Management

Operation of Fair Trade Compliance Program

INNOCEAN operates a fair trade compliance program that sets clear behavioral standards related to fair trade, and encourages employees to comply voluntarily with relevant laws and regulations. The fair trade compliance program is managed directly under the CEO. The head of the Compliance Management Group serves as the compliance officer responsible for overseeing the organization, tasks, and related matters of the compliance program, with the Cooperative Partnership Team serving as the primary department handling operational activities. Additionally, INNOCEAN participates in the Fair Trade Commission's CP rating evaluation to obtain objective verification of the company's compliance system. In the 2024 CP rating evaluation, INNOCEAN received the "AA grade" for the first time in the advertising industry, gaining external recognition for its exemplary fair trade compliance.

Pledge of Commitment to Fair Trade Compliance

The CEO publicly announced a declaration of fair trade compliance to enhance employees' awareness and build trust with external stakeholders. This declaration is posted on the company intranet and INNOCEAN's fair trade webpage to share with all internal and external stakeholders. In 2024, INNOCEAN emphasized that compliance with fair trade laws is essential for corporate management, encouraged active participation of employees in the compliance program, and highlighted the importance of fostering a culture of shared growth with partners. Moreover, a fair trade compliance pledge ceremony was held for employees, where employees pledged to prohibit collusion, establish order in subcontract transactions, prevent unfair transactions with partners, and prohibit improper support of affiliates.

ESG Core Value

2024 Fair Trade Compliance Employee Pledge Ceremony

- 01 Commitment to Fair Trade Compliance: We acknowledge that voluntary compliance with fair trade practices enhances INNOCEAN's competitiveness, and we pledge to actively participate in the Fair Trade Compliance Program (CP) to foster a fair competitive environment.
- Prohibition of Unfair Support and Trade: We will not engage in, endorse, approve, or assist any illegal activities, including unfair support of affiliates or unfair trade practices against our partners.
- Compliance with Subcontracting Laws: We commit to leading the establishment of order in subcontracting transactions by adhering to proper procedures for technical data requests, prohibiting misuse, and preventing unfair price reductions while striving to comply with all relevant laws.
- Avoidance of Collusion: We will refrain from unnecessary contact, as well as direct, approve, or assist in meetings or information exchanges with competitors that could be perceived as collusion.
- Reporting Violations: We will not direct, endorse, or assist in any violations of fair trade-related laws or company regulations, and we will promptly report any suspected violations.

02 Compliance and Ethical Management

Raising Awareness of Fair Trade Compliance

INNOCEAN conducts regular and targeted internal campaigns to enhance employees' awareness and proactively prevent violations. The last week of every month is designated as Compliance and Ethical Management Week, during which fair trade newsletters, fair trade press releases & case studies, and reporting channel guides are distributed to ensure employees stay informed about INNOCEAN's compliance activities and maintain vigilance by monitoring current legal trends and enforcement cases. Additionally, various awareness-building initiatives such as slogan contests, quiz competitions, and awards for compliance contributors are developed and implemented to raise employees' awareness.

Fair Trade Training Program

Introduction

INNOCEAN provides fair trade training for employees. Various forms of fair trade training are conducted, considering job relevance such as by position and department, to improve employees' understanding and awareness. In 2024, 928 employees from the target group completed the basic CP training, achieving a 97% completion rate. Beyond regular courses, useful information and guidelines related to fair trade are shared via the intranet, and compliance training sessions conducted by the CEO received positive feedback from employees.

Internal Monitoring System for Unfair Trade Practices

INNOCEAN has established and operates an internal monitoring system based on the Compliance Program (CP) to manage fair trade risks. Key procedures including subcontract reviews, internal transaction appropriateness assessments, legal consultations on fair trade laws, and prior contract reviews are conducted in consultation with the CP management department, while continuous legal advice is provided to prevent possible legal violations proactively.

Pre-Business Consultation System

Cooperative Partnership Team

- · Review of subcontracts
- · Fair Trade Act-related advice
- · Review on the appropriateness of internal transactions

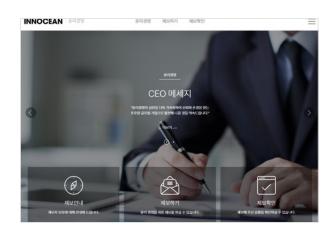

Legal Affairs Team

- · Prior review of contracts
- · On-going legal consultation

Unfair Trade Reporting Channels

INNOCEAN operates channels for unfair trade practices, with related matters managed by the Audit or CP management departments. The management department investigates and handles received reports according to the unfair trade reporting procedures. Strict anonymity is ensured for all reports under whistleblower protection principles, safeguarding reporters from exposure or discriminatory treatment to prevent any disadvantage caused by reporting. To date, no secondary harm from reporting activities has occurred

Unfair Trade Practice Reporting Channels

Special Page | Greenwashing Risk Management

Compliance with Greenwashing Prevention Principles

INNOCEAN adheres to the "8 Principles for Preventing Greenwashing" established by the Ministry of Environment and the Fair Trade Commission. INNOCEAN systematically addresses greenwashing risks in advertising.

Sincerity	 All eco-friendly advertising content must be based on factual information All advertising content must be accurate and not misleading/ deceptive to consumers 	Specificity of Target	The scope of claims must be clearly defined, specifying whether they apply to the entire company, all products, or specific product components
Spontaneity	You must not advertise voluntary improvements for matters that are legally mandated compliance requirements	Relevance	Advertising improvements to environmental factors that are unlikely to occur constitutes misleading communication
Clarity of Expression	Text positioning, sizing, and design elements must be precise and clear Content must not create potential for deception/misunderstanding through omissions/reductions	Proportionality	Avoid overstating limited improvements as company-wide enhancements Statistically specific evidence is required
Completeness of Information	Important information that influences purchasing decisions must not be omitted/withheld/minimized All relevant information must be readily accessible to consumers for verification	Verifiability	Current, objective, and scientifically reproducible evidence must be obtained

Establishment of Greenwashing Risk Self-Assessment Process

INNOCEAN operates a "Pre-Assessment Process for Eco-Friendly Productions," which enables proactive on-site checks during eco-friendly advertisement production to prevent greenwashing incidents. This process also enhances understanding through internal guidelines and training for practitioners. Since unsubstantiated or exaggerated eco-friendly messaging can negatively impact corporate credibility, checklist-based inspections and monitoring are conducted from the initial production stages. INNOCEAN recognizes greenwashing as a significant management risk and continuously strengthens its prevention system to ensure advertisement reliability and transparency.

Greenwashing Prevention Training

INNOCEAN conducts greenwashing prevention training using card news and other materials to help frontline workers independently identify greenwashing risks and mitigate potential risks in their workflows.

Independent Assurance Statement

Assurance Outline

Korea Productivity Center Quality Assurance (hereinafter "KPCQA") was commissioned by Innocean Worldwide (hereinafter "Innocean Worldwide") to conduct an independent assurance on the 2024 Sustainability Report (hereinafter "the report") and issues an assurance statement. Innocean Worldwide has sole responsibility for the preparation of the data within the report. KPCQA's responsibility is to provide objective opinions on this report with the specified criteria and scope of assurance.

Scope

This report describes Innocean Worldwide's sustainability efforts and performance. The scope of assurance was included on activities from January 1, 2024 to December 31, 2024. Activities through 2025 has also been used in some areas. The report was assured focusing on the reporting of sustainable management policies, strategies, goals, businesses, and performance, and conformity of data collection and analysis, and the report creation process.

Criteria

The assurance was carried out in accordance with the following standards:

- AA1000AS v3
- KPCQA FSG Assurance Protocol

Levels

The assurance of this report was conducted in line with the requirements of the AA1000AS v3 Type 1 (Adherence to the AA1000 four principles) at moderate level of assurance. The assurance was applied by professional judgement about materiality.

The report has been produced in accordance with GRI Standards. We confirmed that the report was complied with reporting principles of GRI Standards, Universal Standards, and Topic Standards based on the data and information provided by Innocean Worldwide.

Universal Standards

Organizational and its reporting practices	2-1~2-5
Activities and workers	2-6~2-8
Governance	2-9~2-21
Strategy, policies and practices	2-22~2-28
Stakeholder engagement	2-29~2-30
Material topics	3-1~3-3

Topic Standards

Economic Performance	201-1		
Indirect Economic Impacts	203-1		
Anti-corruption	205-2, 205-3		
Anti-competitive Behavior	206-1		
Tax	207-4		
Energy	302-1, 302-3		
Water and Effluents	303-5		
Biodiversity	304-3		
Emissions	305-1, 305-2, 305-3, 305-4		
Waste	306-3		
Employment	401-1, 401-3		
Occupational Health and Safety	403-1, 403-2, 403-4, 403-5, 403-6, 403-8, 403-9		
Training and Education	404-1, 404-2, 404-3		
Diversity and Equal Opportunity	405-1, 405-2		
Non-discrimination	406-1		
Local Communities	413-1		
Supplier Social Assessment	414-2		
Customer Privacy	418-1		

Methodology

- Review of sustainability performance data and management system
- Review of the reporting process and data management framework
- · Review of materiality assessment process and Internal Analysis Procedure
- · Review of media report on sustainability
- Interviews with executives and employees involved in material topics and report preparation
- · Review of the overall report

Limitations

This assurance is limited assurance in limited criteria with comparative review of data provided by Innocean Worldwide. It has its own limitations depending on the characteristics and calculation method of the data.

Independent Assurance Statement

Conclusions

KPCQA conducted assurance on the draft by review of the data, onsite verification and interview with the employees. It was confirmed that all errors identified during the assurance were corrected.

As a result of the assurance of this report, no material errors or improper descriptions have been found and the conclusions are as follows.

- Inclusivity: Participation of stakeholders Innocean Worldwide operates stakeholder communication channels to gather opinions from various stakeholders to derive material topics and ensure that they are reflected in decision-making.
- Materiality: Selection and reporting of material topics Innocean Worldwide presented sustainability performance data without any material omissions. Relating to the material issues in the report, nothing had come to our attention that would cause problem in decision-making process.
- · Responsiveness : Organizational response to issues KPCQA checked and reviewed the data related to the internal and external stakeholders of Innocean Worldwide, we confirmed Innocean Worldwide identified the reporting scope and stakeholders' interests and reflected them. We confirmed Innocean Worldwide has management process of material topics through materiality assessment
- Impact: Monitoring and measurement of business activities KPCQA reviewed Innocean Worldwide identified and monitored the impact of Innocean Worldwide's business activities on stakeholders. we confirmed the impact associated with material issues have been properly measured.

Independence of Assurance

KPCQA is a 3rd Party Conformity Assessment Body that conforms to ISO/ IEC 17021:2015 and has documented policies, assessment processes, and quality assurance systems with assurance team of ESG experts. KPCQA was not involved in any of the business operations of the Innocean Worldwide and the assurance was conducted with independence.

Jun 2025, Korea Productivity Center Quality Assurance

GHG Emission Verification Opinion

1. Verification Goal

The goals of greenhouse gas (GHG) emission verification (hereinafter referred to as 'verification') conducted by the Korean Standards Association are as follows.

- · Confirming the conformity with standards and procedures of GHG emission and GHG emissions calculated within the scope of verification
- · Checking the validity of declarations related to the organization's GHG emissions or removals
- · Confirming the effective implementation of the organization's management of GHG emissions or removals
- · Confirming the conformity of processes for implementing, managing and improving the organization's GHG emissions or removals estimates

2. Verification Scope

Korean Standards Association conducted limited guarantee level verification Scope1, Scope2 and Scope3 for INNOCEAN Inc.'s Greenhouse Gas declaration.

- · Reporting Target: INNOCEAN Inc. Head Office
- Boundary: Scope1 (Direct emissions), Scope2 (Indirect emissions), Scope3 (Other Indirect emissions)
- Scope1: Stationary combustion, Mobile combustion
- Scope2: Externally purchased power
- Scope3: Category 6. Business trip (domestic and foreign air travel), Category 7. Commuting
- Year: January 1, 2024 to December 31, 2024

3. Verification Criteria

Korean Standards Association conducted verification according to the procedures stipulated in ISO 14064-3: 2019.

- · Calculation criteria
- KS USO 14064-1: 2018
- Verification Guidelines for the Operation of the Greenhouse Gas Emissions Trading System (Recent Issue, Ministry of Environment Notice No. 2024-169)
- -Guidelines for Reporting and Certification of Emissions from Greenhouse Gas Emissions Trading System (Ministry of Environment Notice No. 2024-155)
- 2006 IPCC (Intergovernmental Panel on Climate Change) Guidelines
- WRI (World Resources Institute) Greenhouse Gas Protocol
- Corporate Value Chain (Scope3) Accounting and Reporting Standard (WRI)

4. Level of assurance verification and Responsibility

Korean Standards Association provides verification at limited level of assurance to strengthen GHG management for your company's GHG emissions.

- On-site inspection: Visit to INNOCEAN Inc. Head Office
- Method of confirmation
- Interview with greenhouse gas emissions manager and field staff
- -Review of the management system and data used to calculate greenhouse gas emissions during the reporting period
- Tracking review of internal documents and basic data

INNOCEAN Inc. should provide fair data on information and evidence related to GHG emissions, and the KSA is limited to guaranteeing GHG emissions.

5. Verification Limit

GHG emissions can be affected by factors such as data limits and uncertainties in the scope of verification, and inherent limitations may exist accordingly.

6. Verification Conclusion

No errors or false facts were found in INNOCEAN Inc.'s GHG emissions verified through the ISO 14064-3 verification procedure within the scope of verification.

GHG emissions (Scope1, Scope2)

(Unit: tCO2eq)

Year	Scope1	Scope2	Total
2024	296	364	660

* Note: The final greenhouse gas emission was cut below the decimal point and expressed in

Appendix 2 GHG emissions (Scope3)

(Unit: tCO2ea)

	Category	GHG Emissions
Category 6	Domestic and foreign air travel	810
Category 7	Commuting	375
	Total	1,184

* Note: The final greenhouse gas emission was cut below the decimal point and expressed in integer units.
